

Victorian mineral exploration fairways – New investment opportunities throughout the State

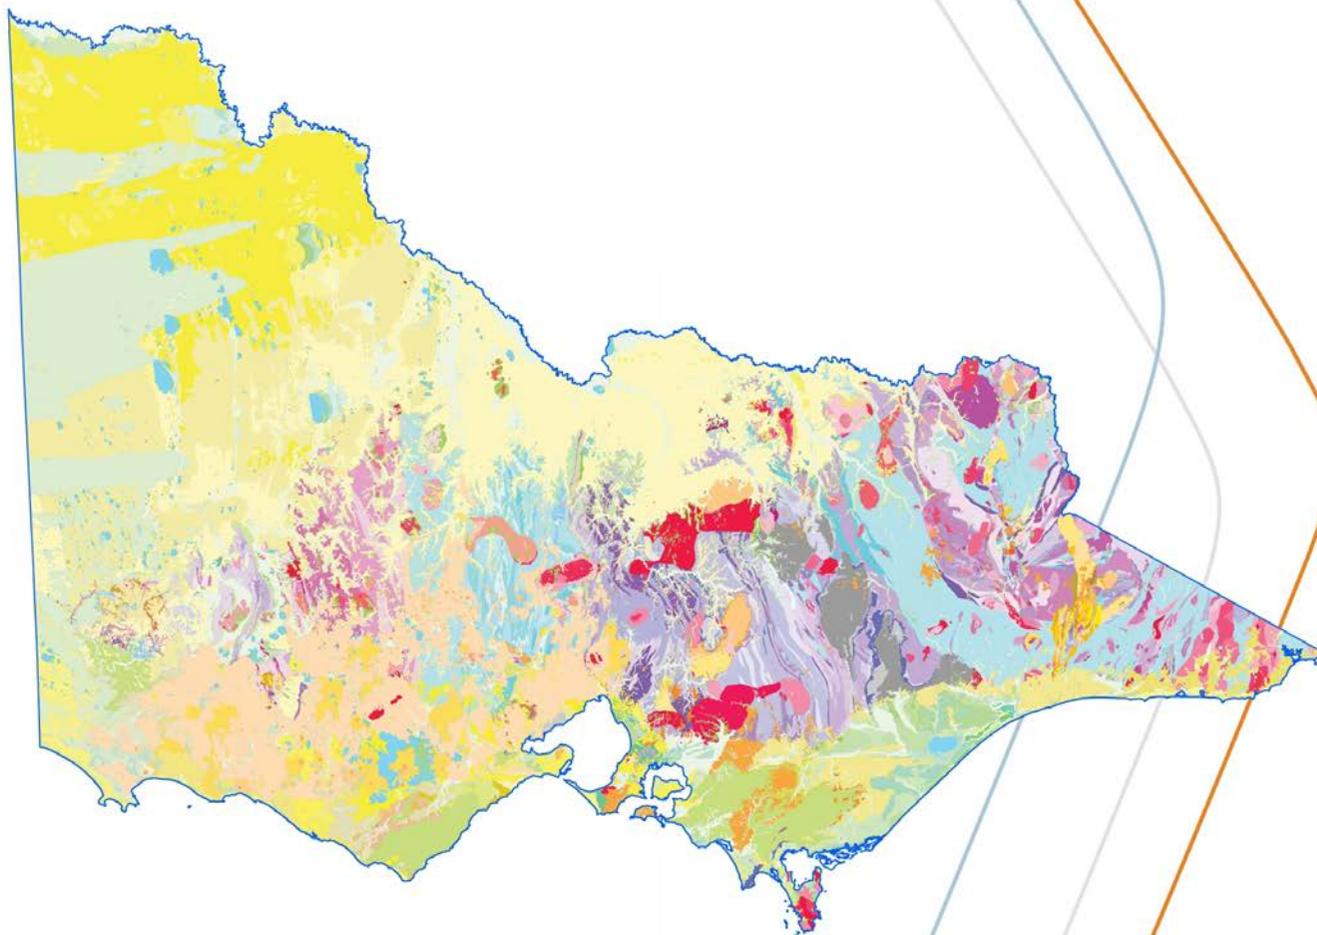

Cutting edge geoscience delivers:

- new-generation geological research and geophysical data acquisition gives a deep understanding of Victoria's mineral endowment
- Enables a 'systems' approach to characterise Victoria's major mineral exploration fairways

State-wide seamless geology.....

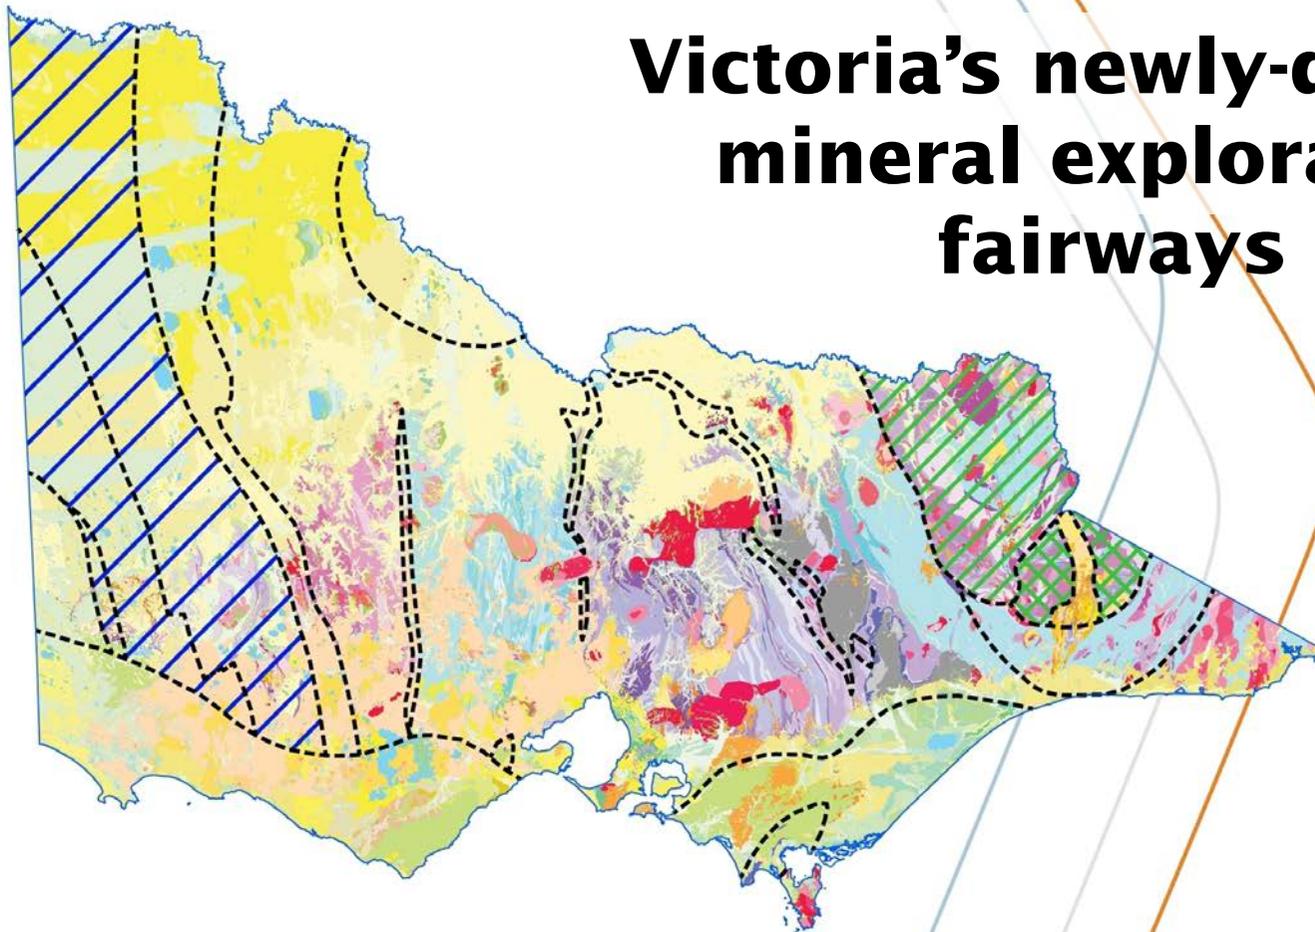

MINERALS
DEVELOPMENT
VICTORIA

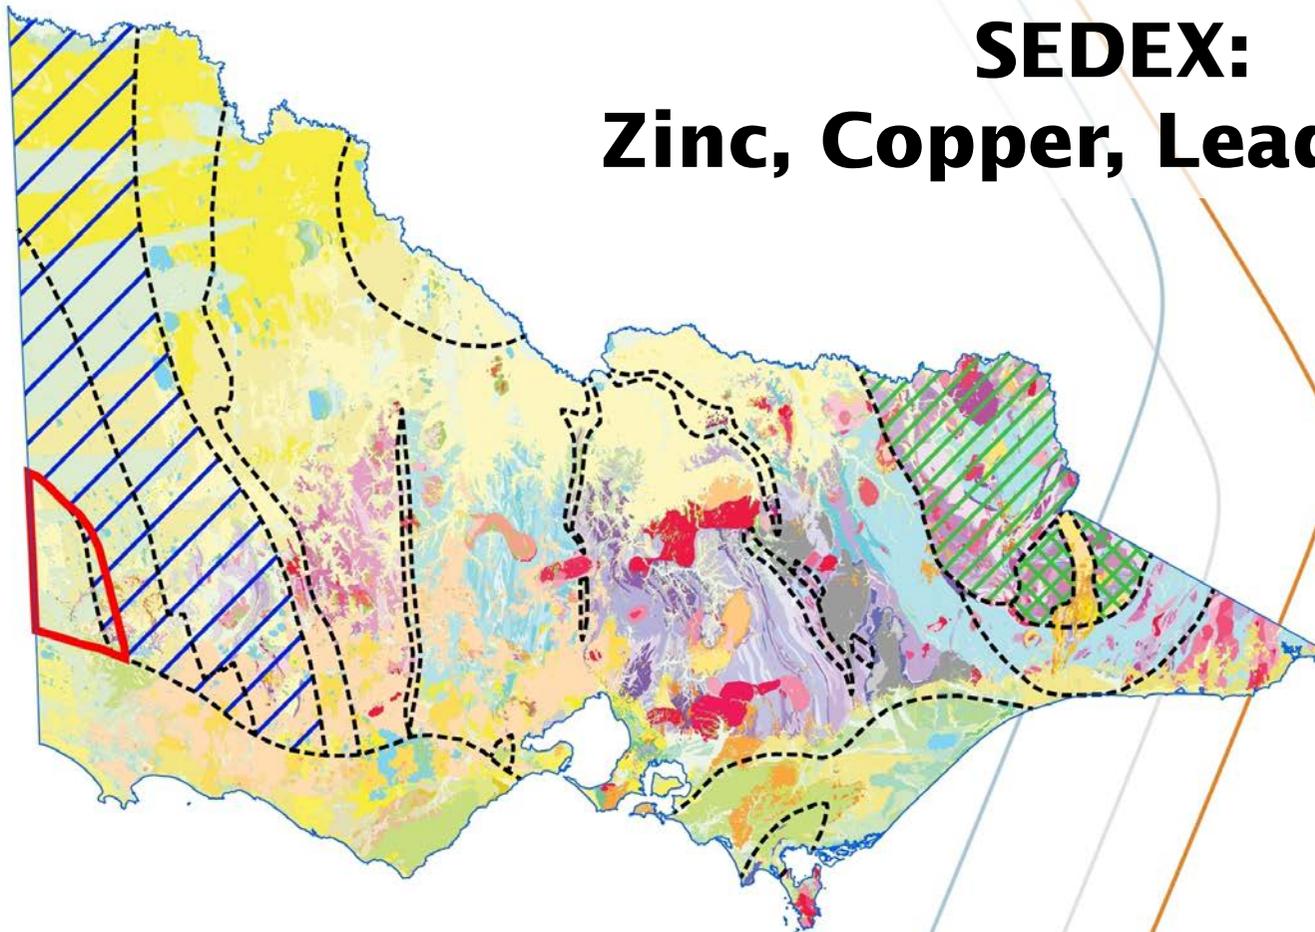

...supports state-wide minerals systems analysis.....

Victoria's newly-defined mineral exploration fairways

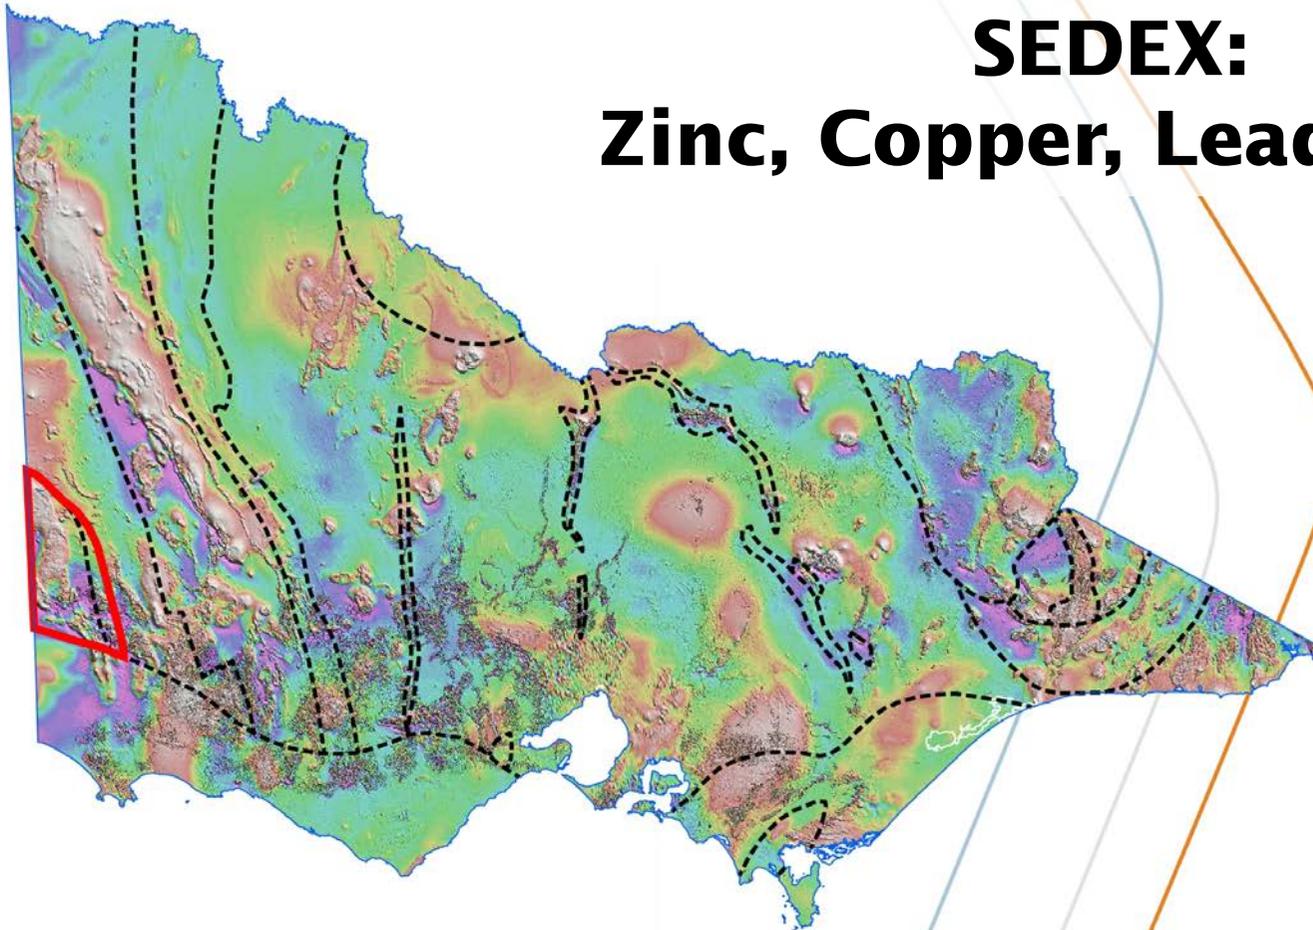

...from west, to east.....

Kanmantoo-Strathalbyn SEDEX: Zinc, Copper, Lead, Silver

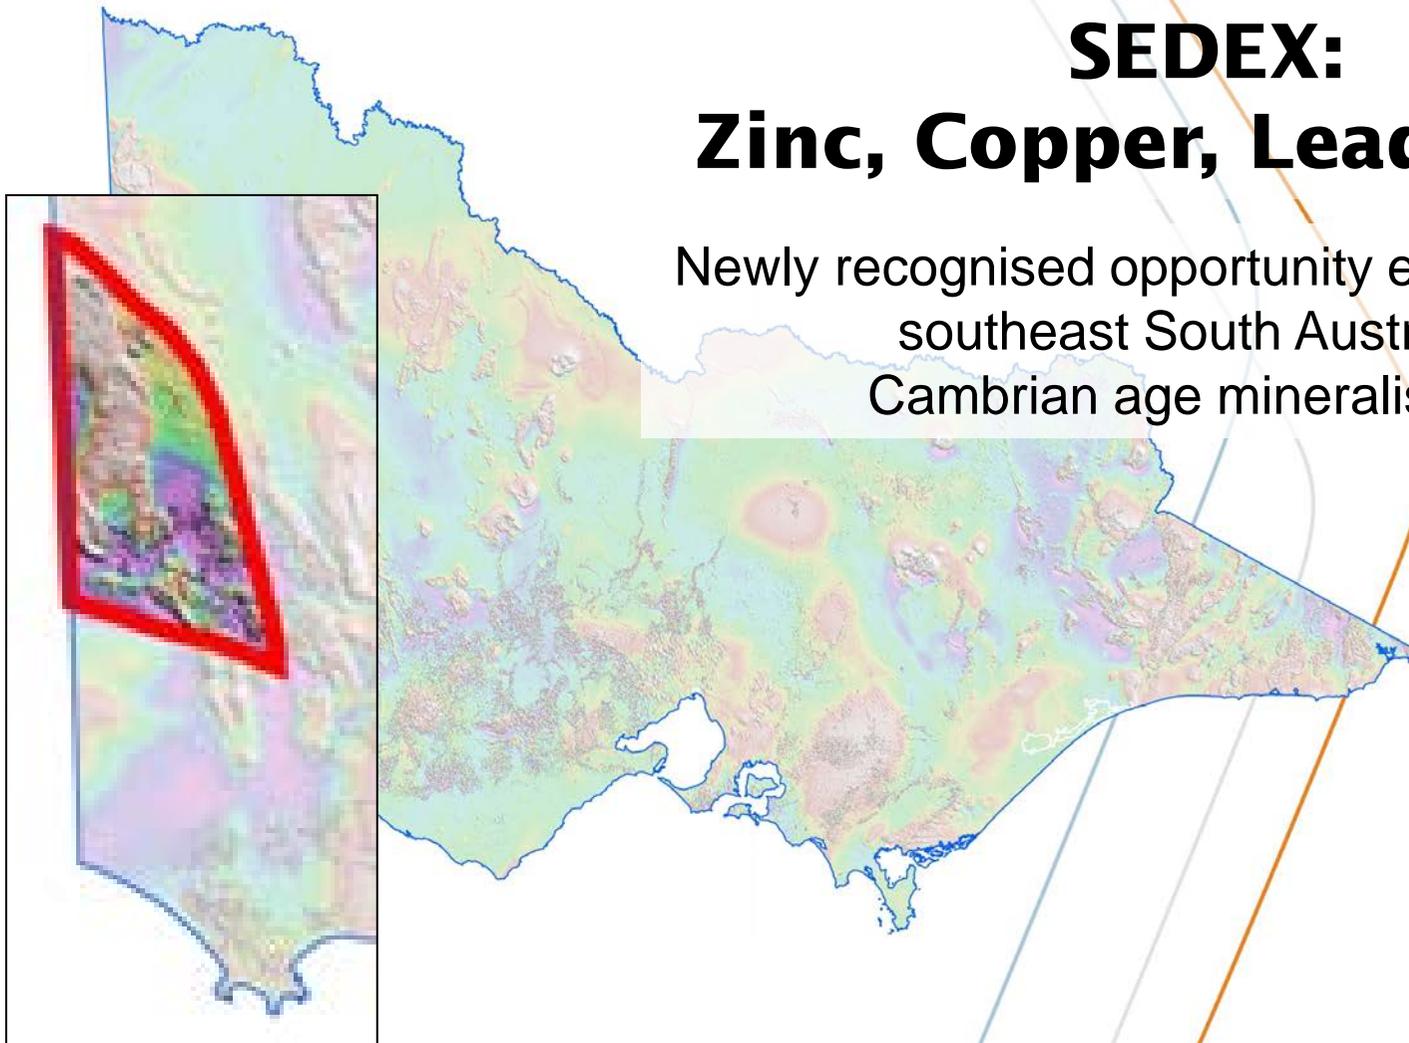

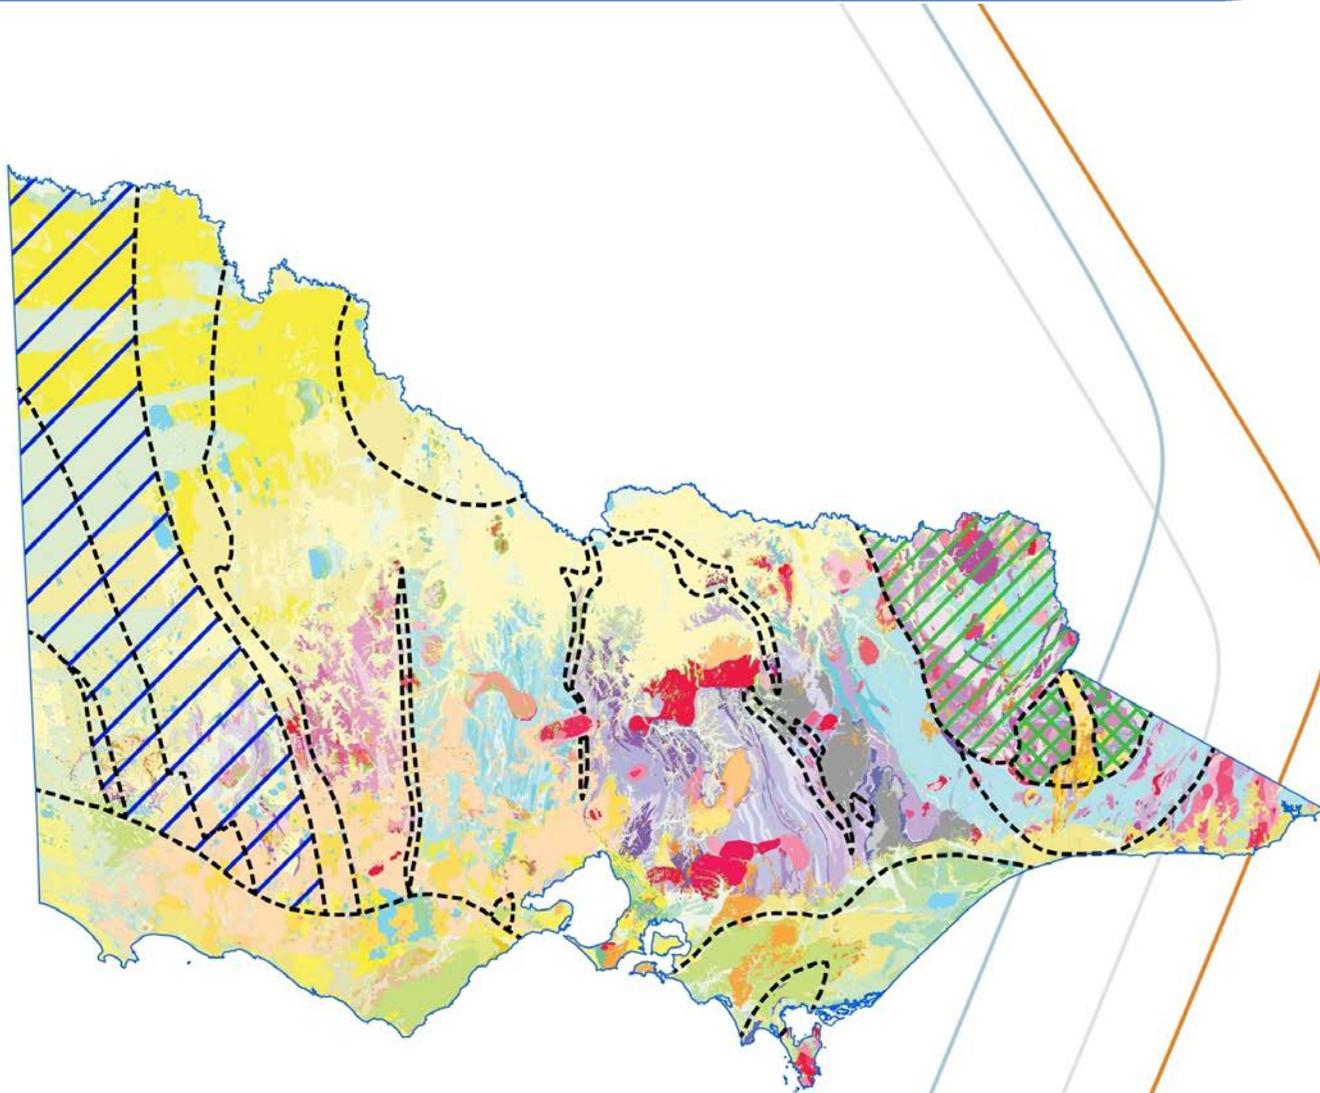

Kanmantoo-Strathalbyn SEDEX: Zinc, Copper, Lead, Silver

Kanmantoo-Strathalbyn SEDEX: Zinc, Copper, Lead, Silver

Newly recognised opportunity extending from
southeast South Australia;
Cambrian age mineralisation

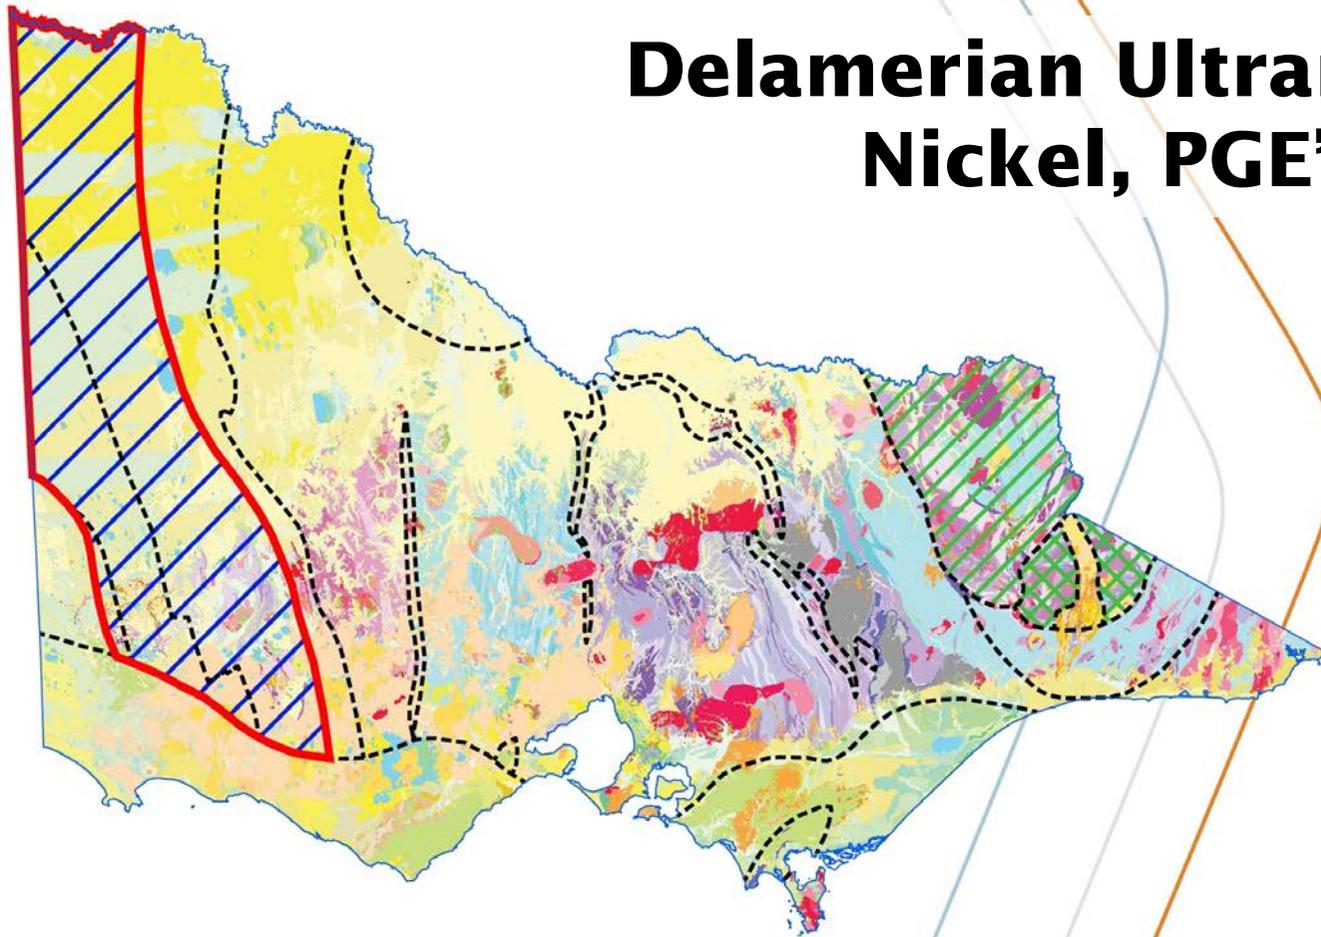

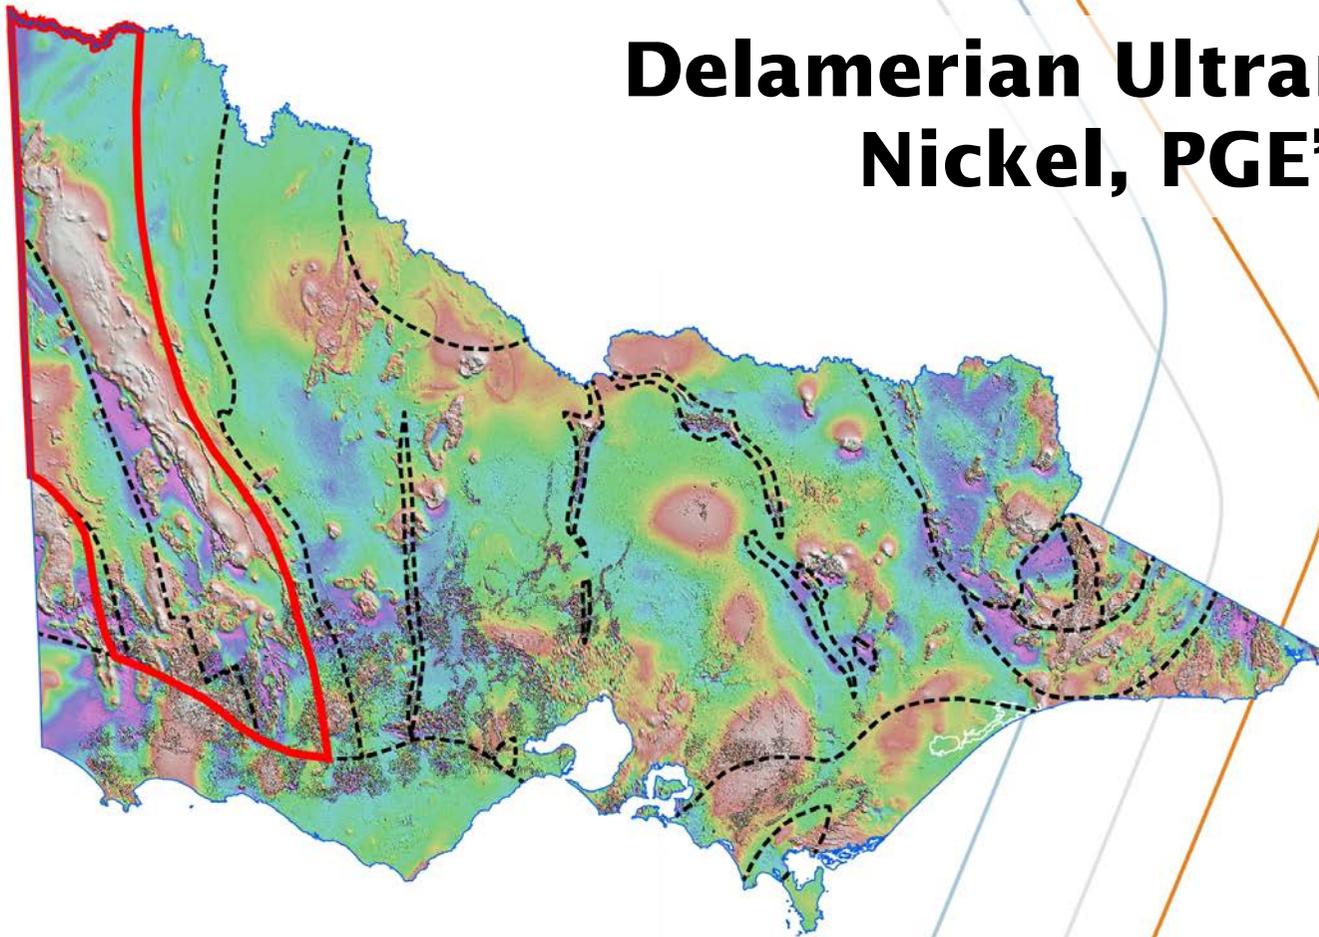

MINERALS
DEVELOPMENT
VICTORIA

Delamerian Ultramafics: Nickel, PGE's

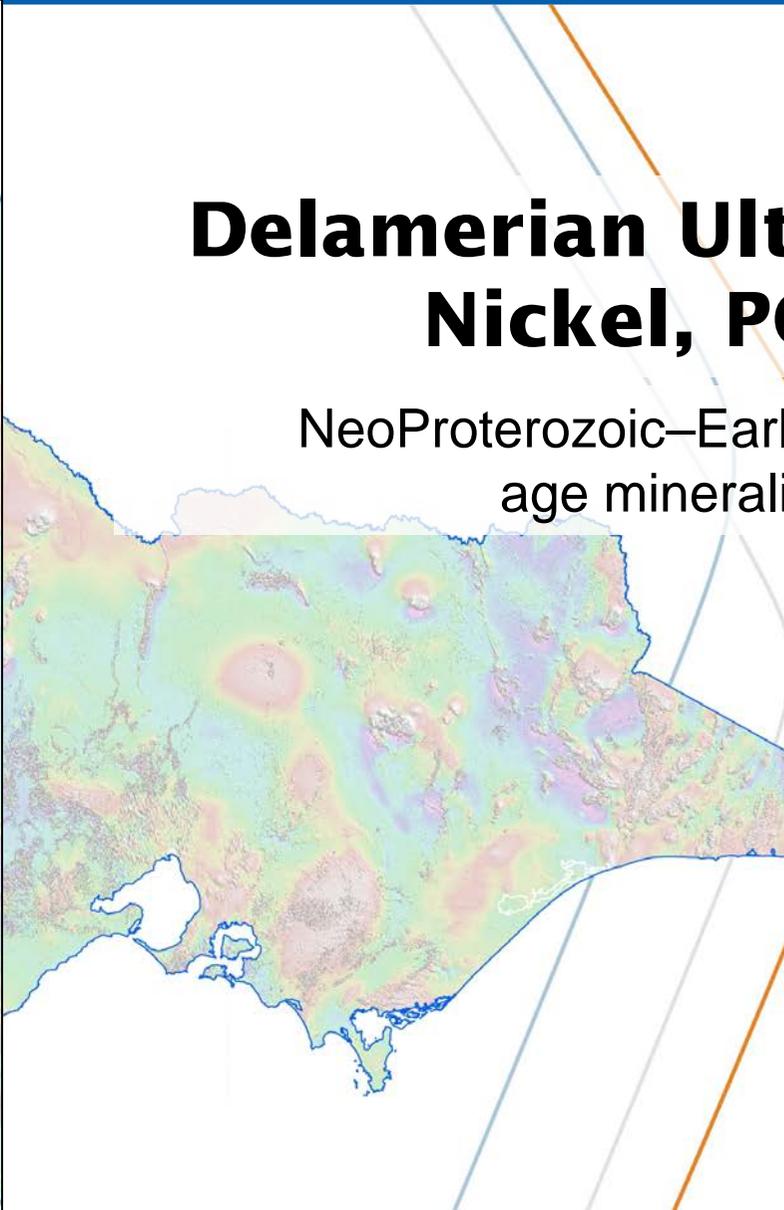

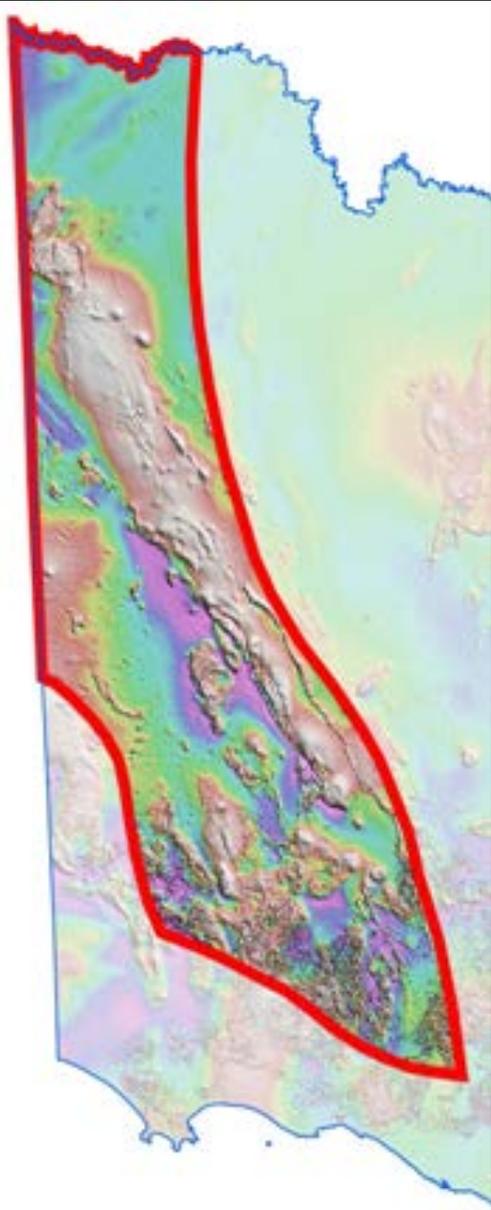

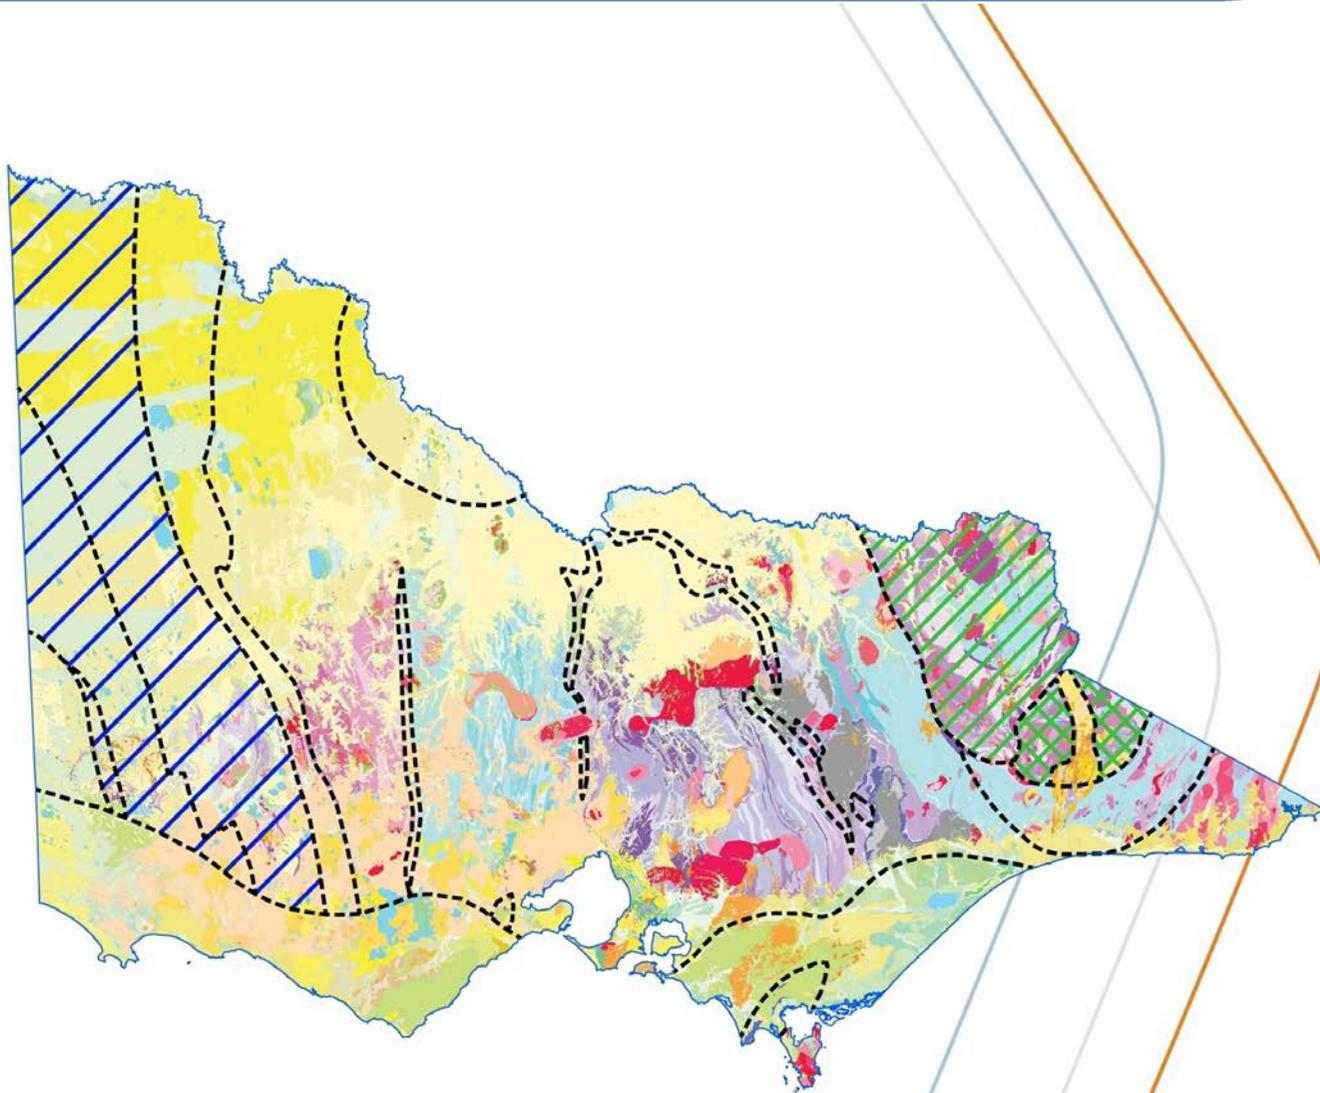

Delamerian Ultramafics: Nickel, PGE's

Delamerian Ultramafics: Nickel, PGE's

NeoProterozoic–Early Cambrian
age mineralisation

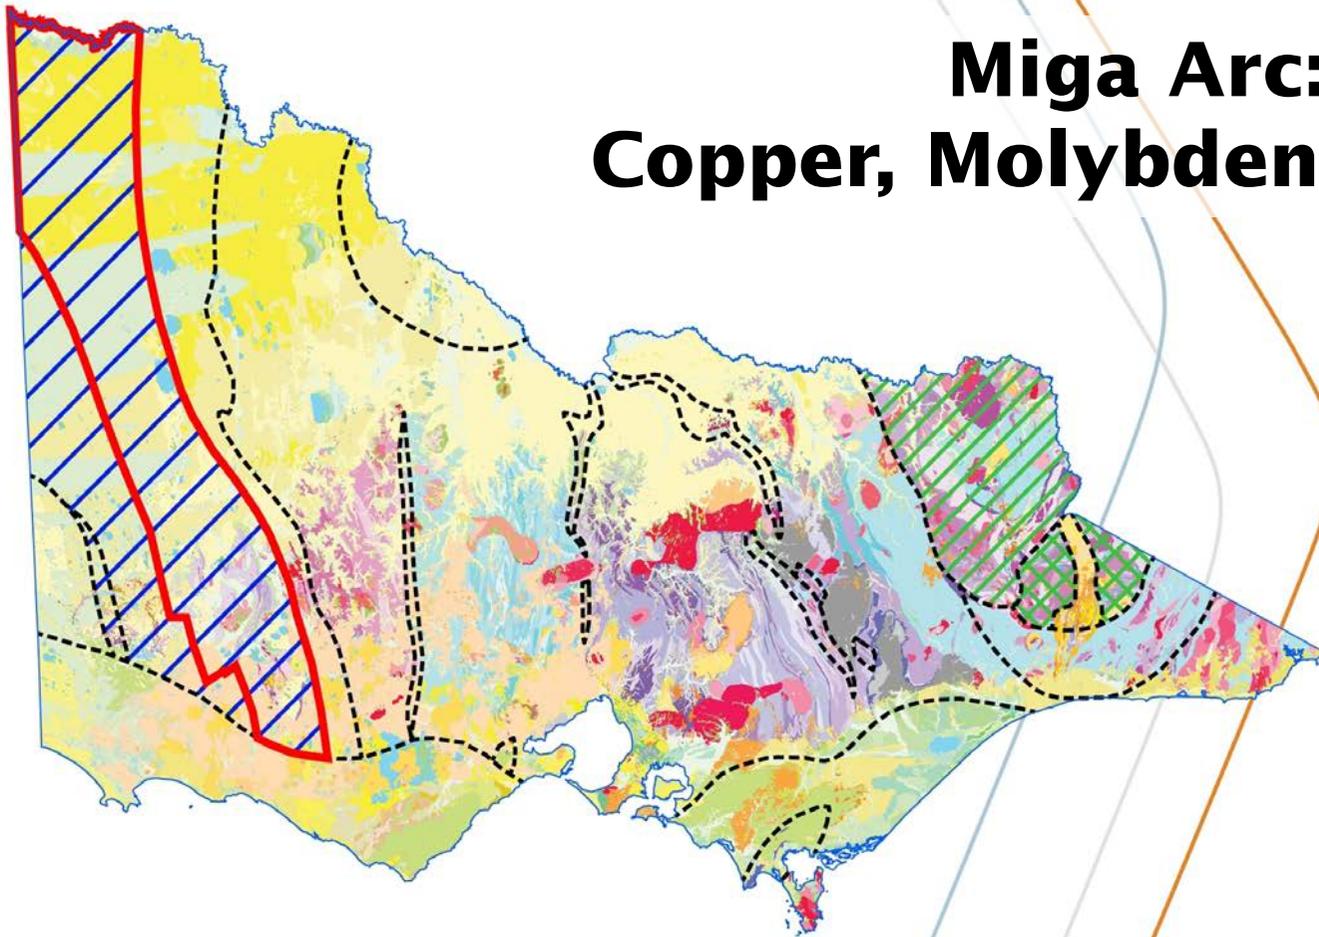

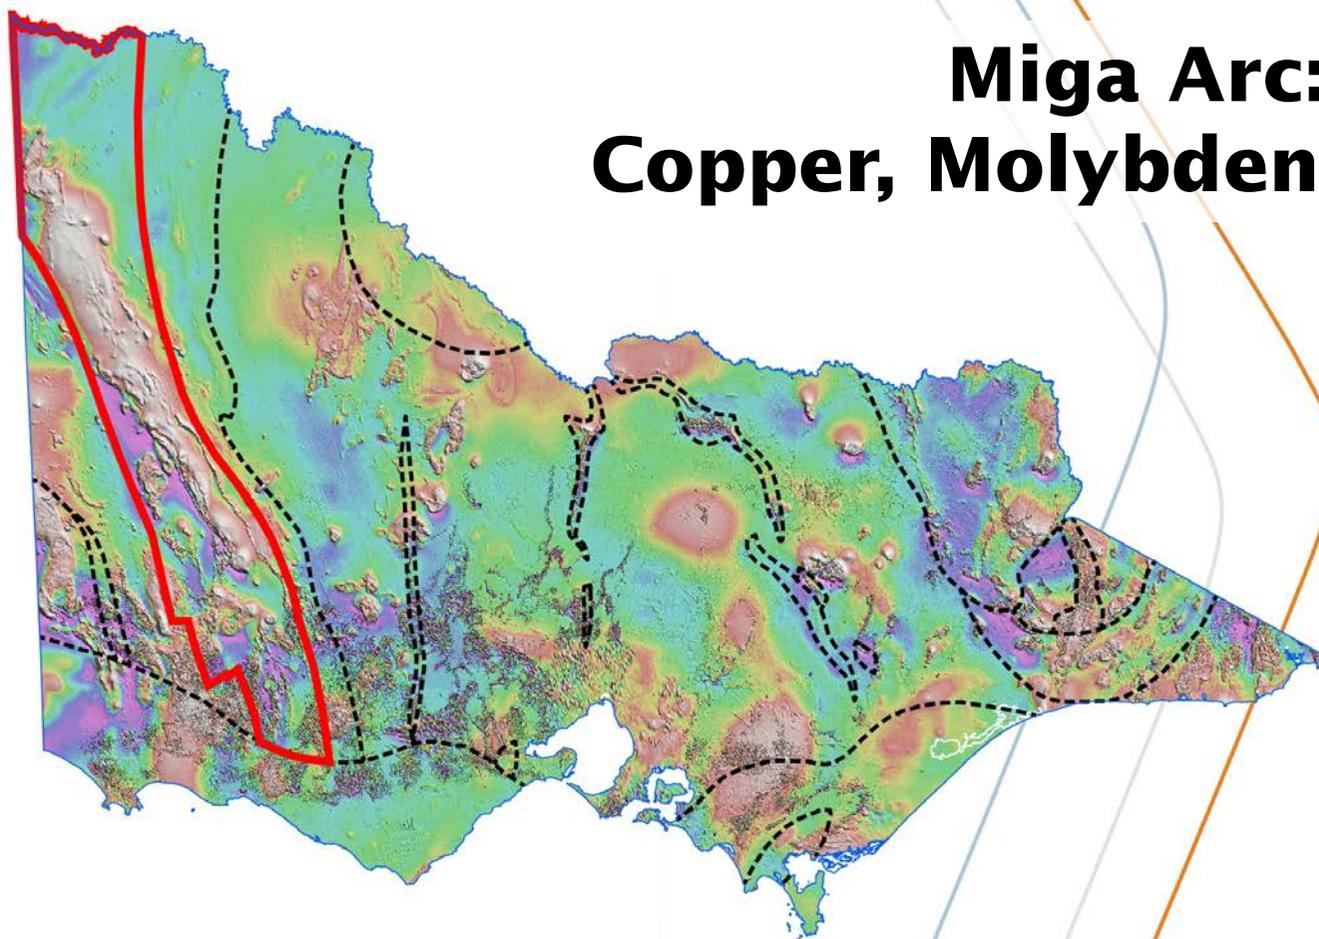

MINERALS
DEVELOPMENT
VICTORIA

Miga Arc: Copper, Molybdenum, Gold

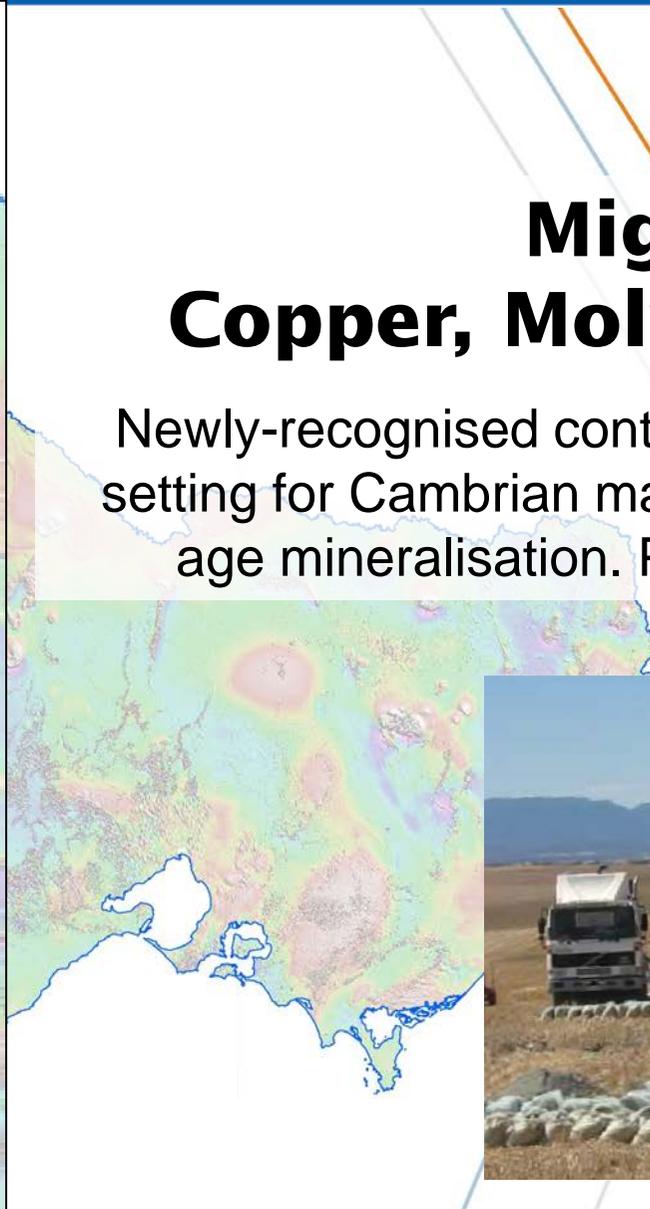

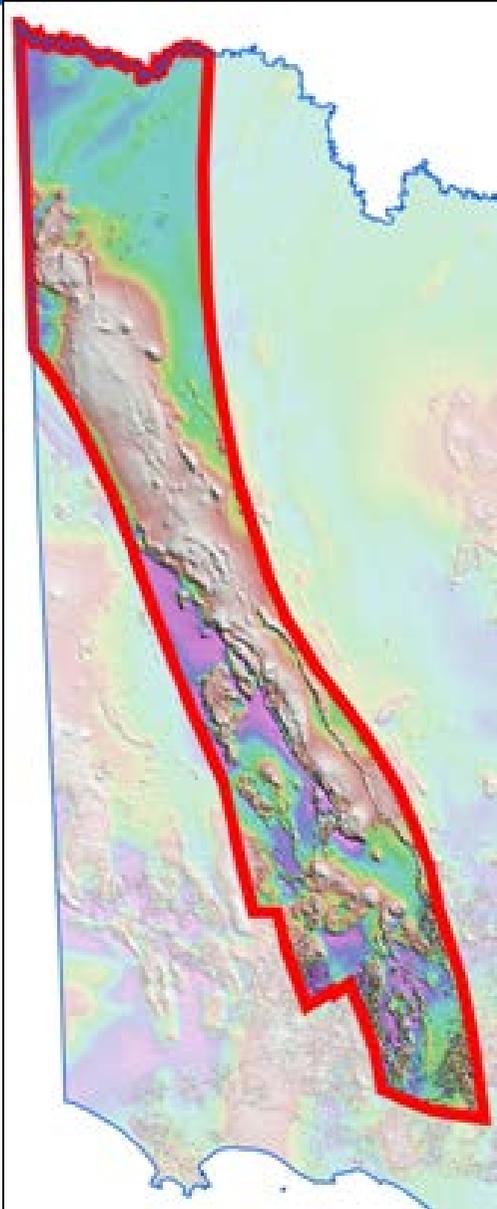

Miga Arc: Copper, Molybdenum, Gold

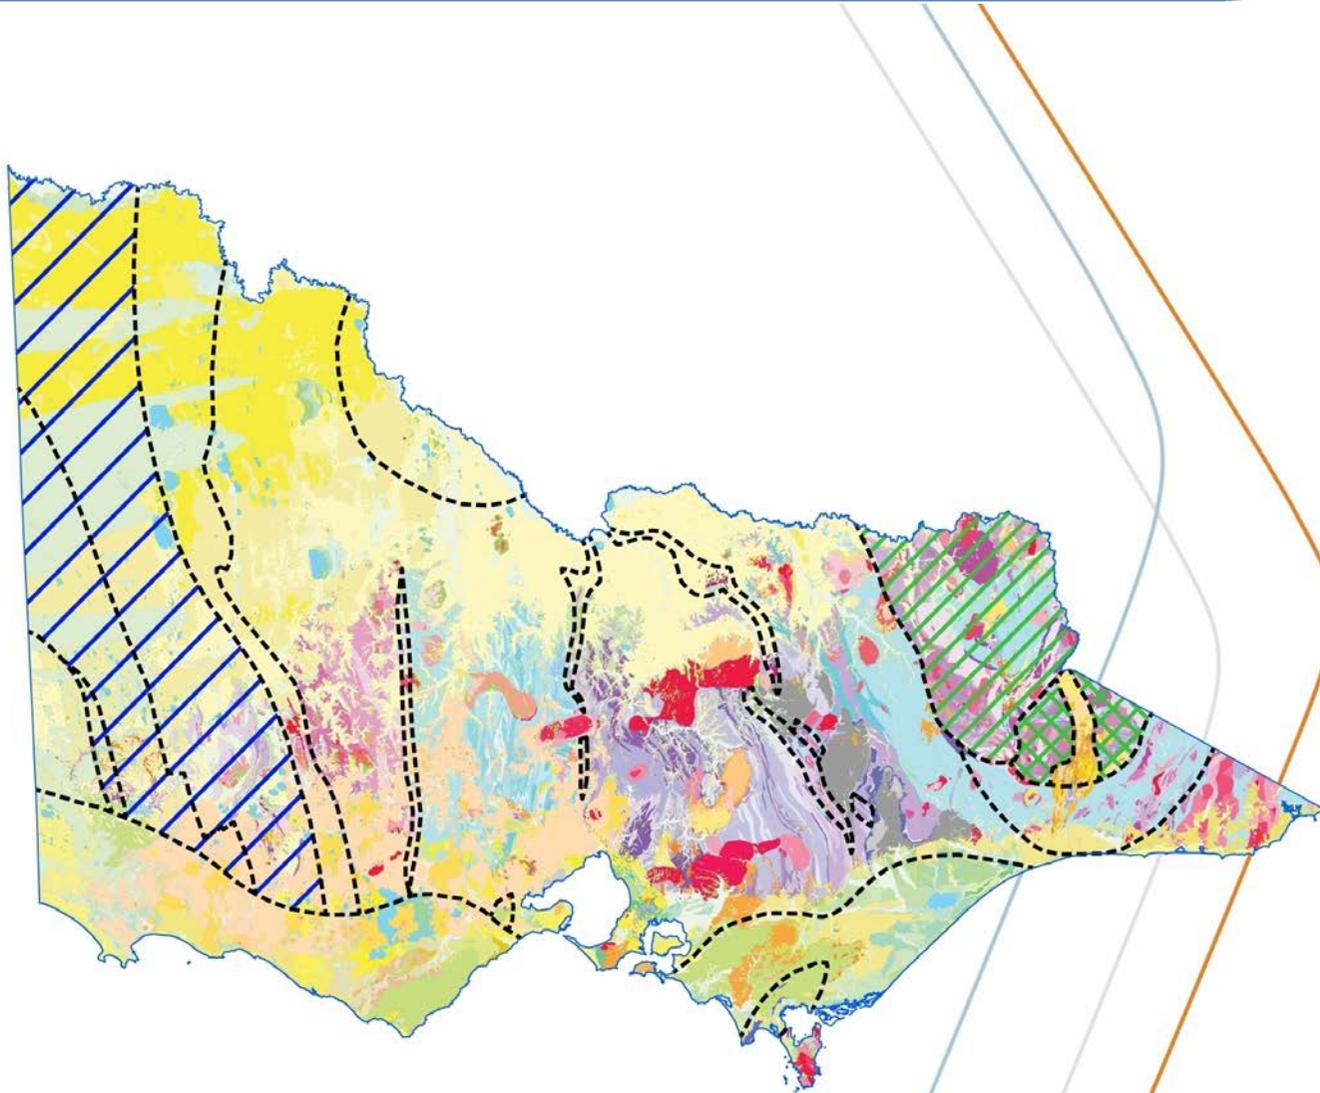

Miga Arc: Copper, Molybdenum, Gold

Newly-recognised continental margin volcanic arc setting for Cambrian magmatic complex; Cambrian age mineralisation. Porphyry and VMS plays

Copper resource,
Mt Stavely

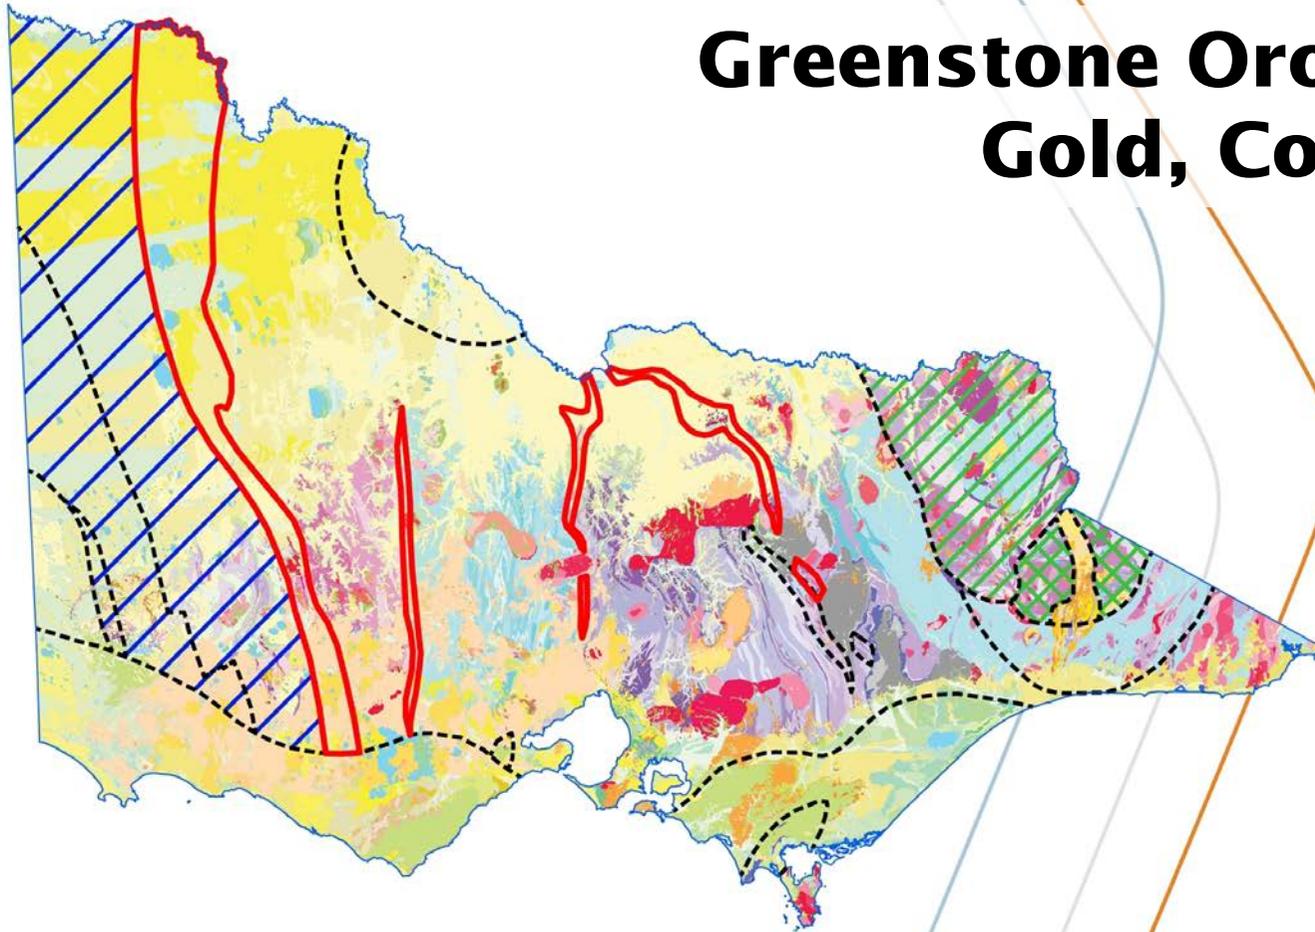

MINERALS
DEVELOPMENT
VICTORIA

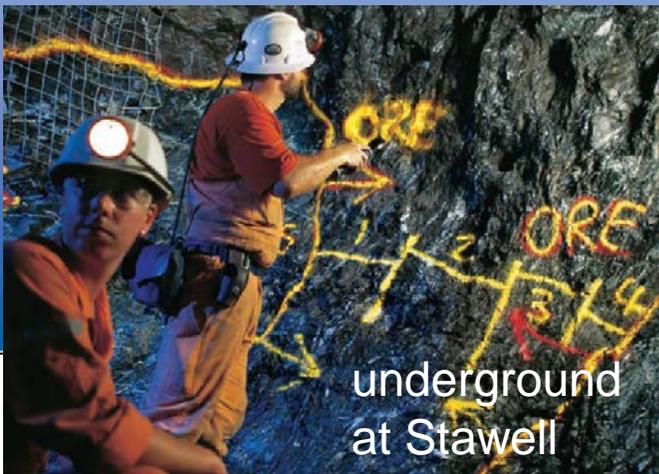

Greenstone Orogenic Gold: Gold, Copper

Greenstone Orogenic Gold: Gold, Copper

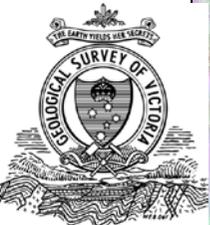

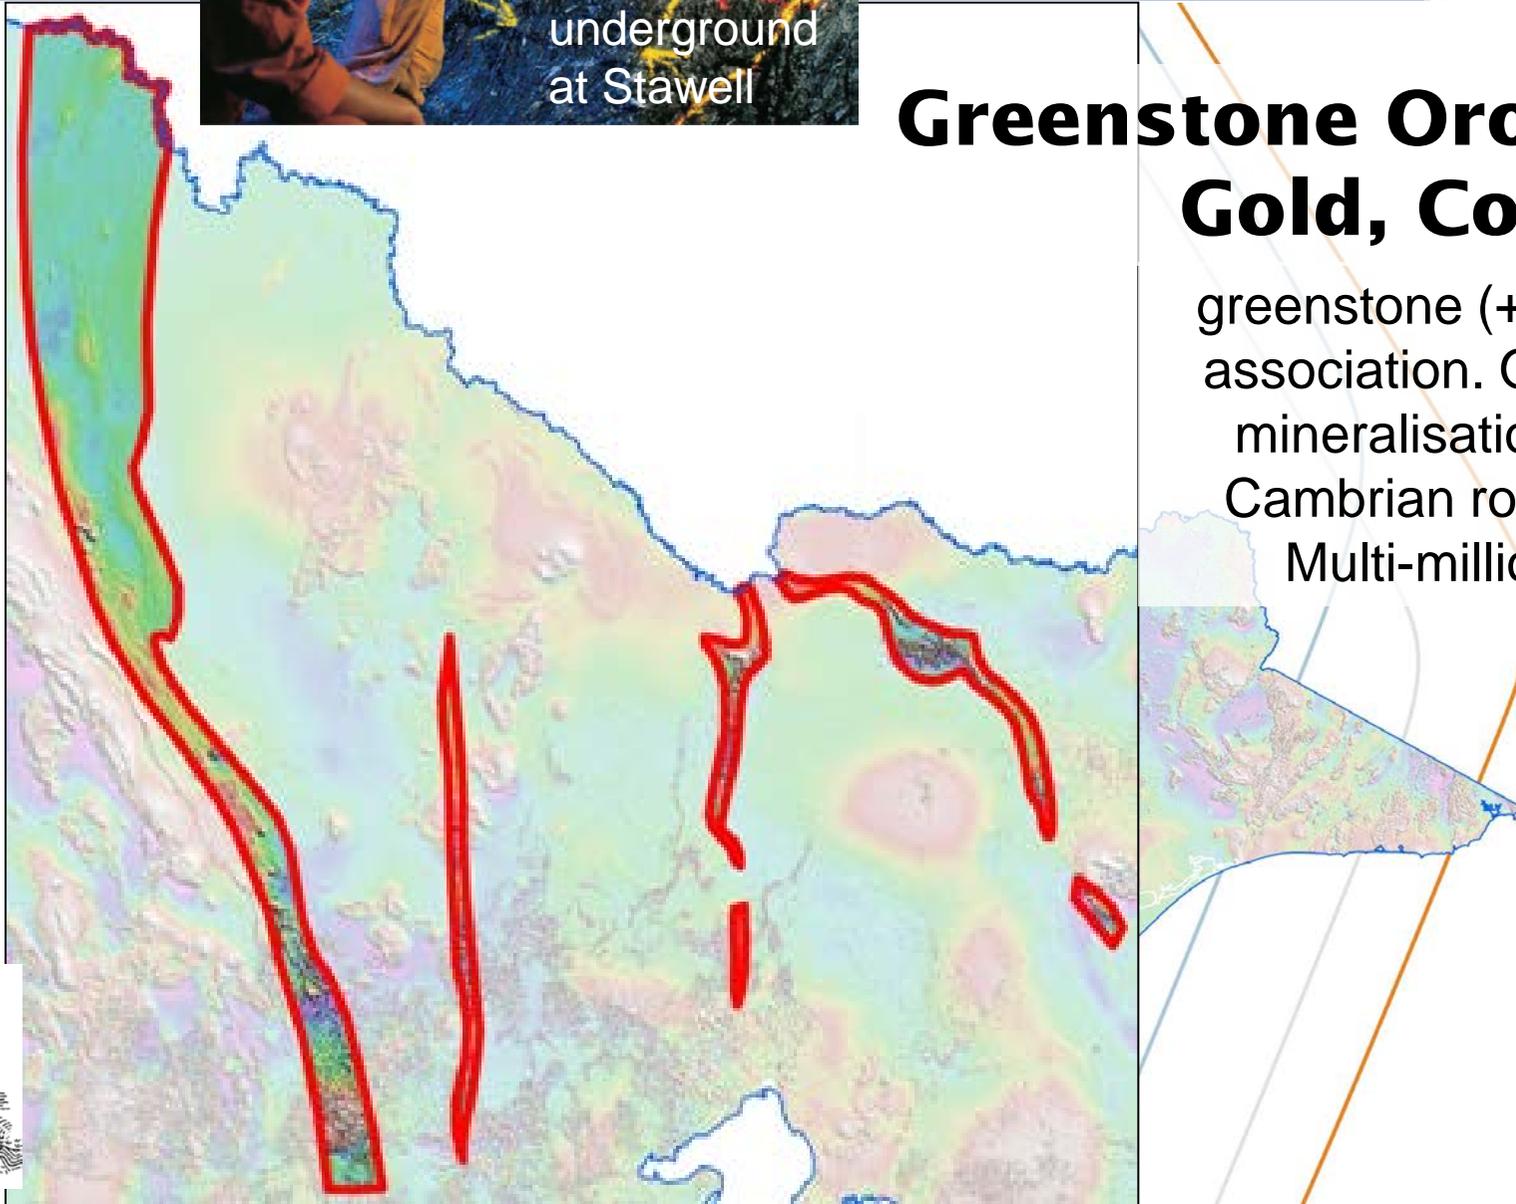

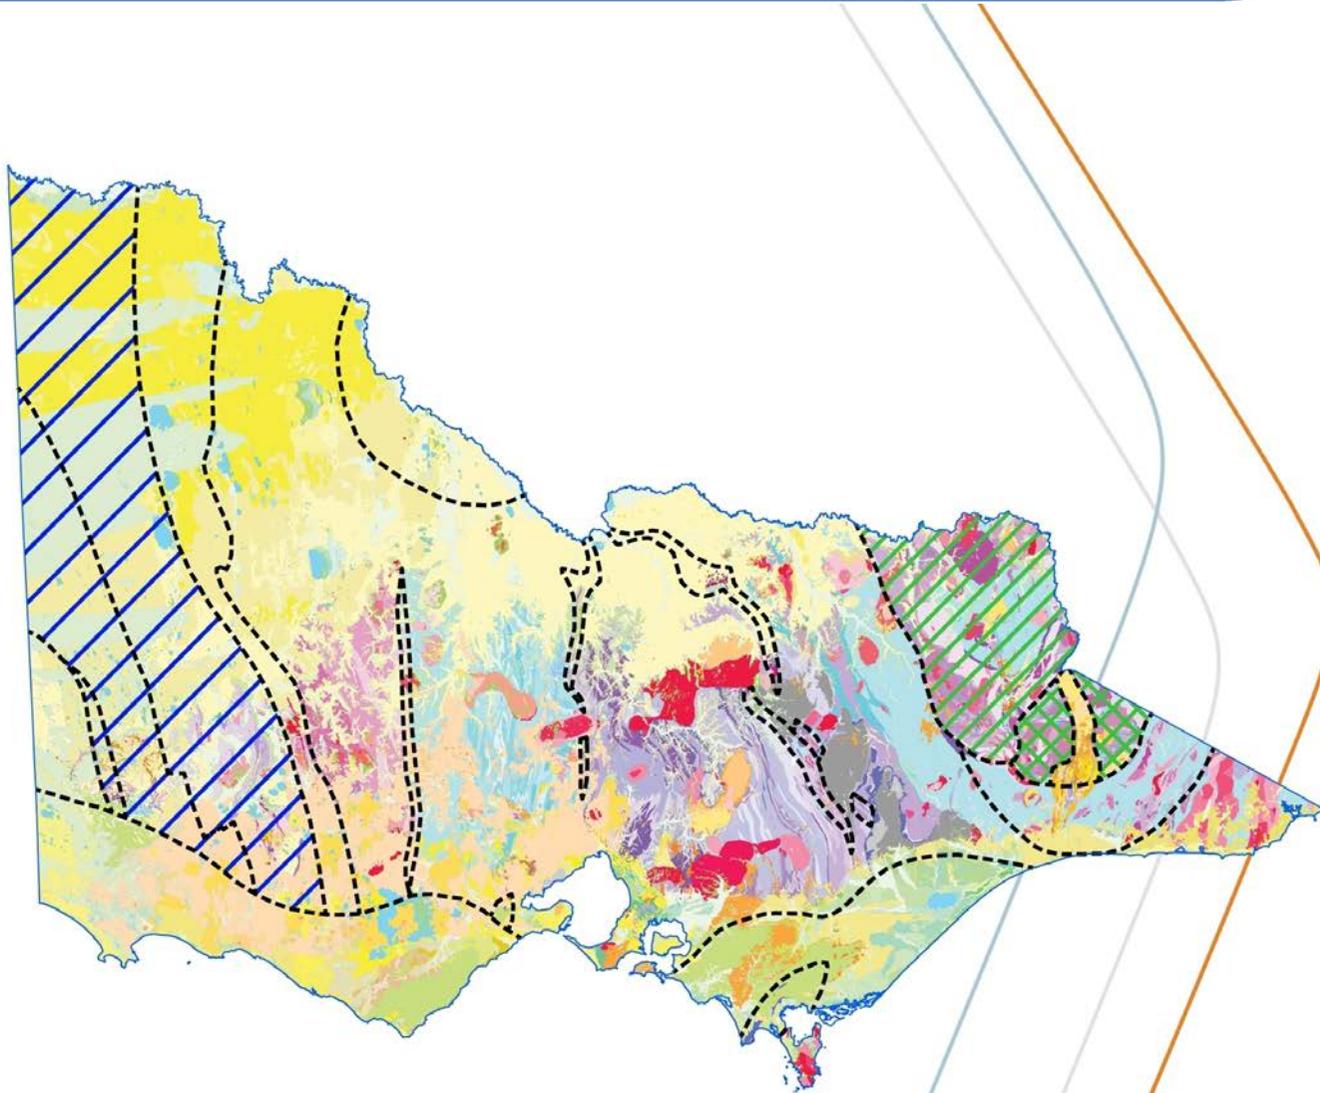

underground
at Stawell

Greenstone Orogenic Gold: Gold, Copper

greenstone (+/- VMS) – gold
association. Ordovician age
mineralisation (hosted by
Cambrian rocks +/- VMS);
Multi-million oz plays

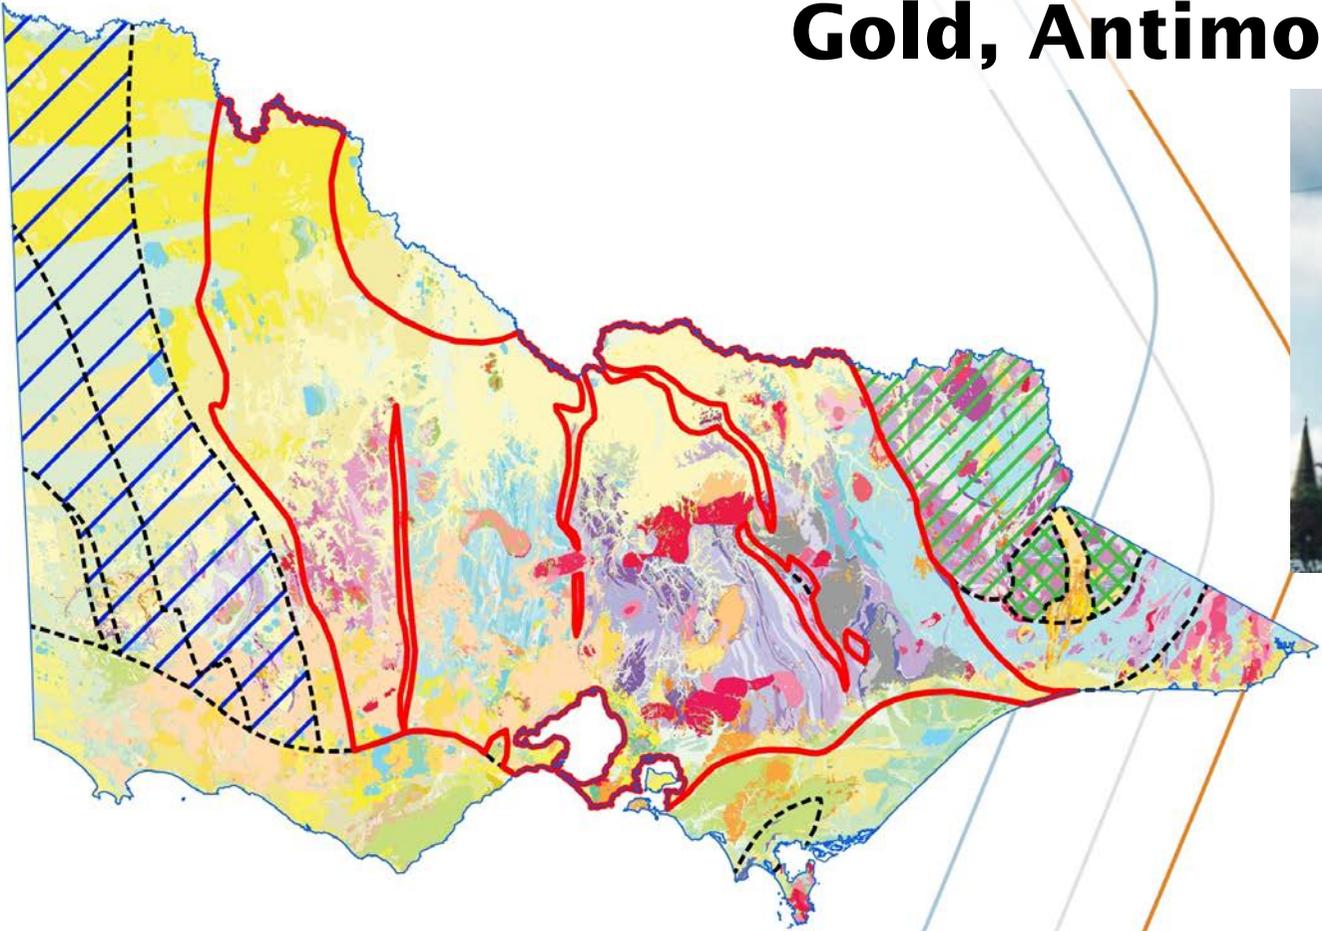

MINERALS
DEVELOPMENT
VICTORIA

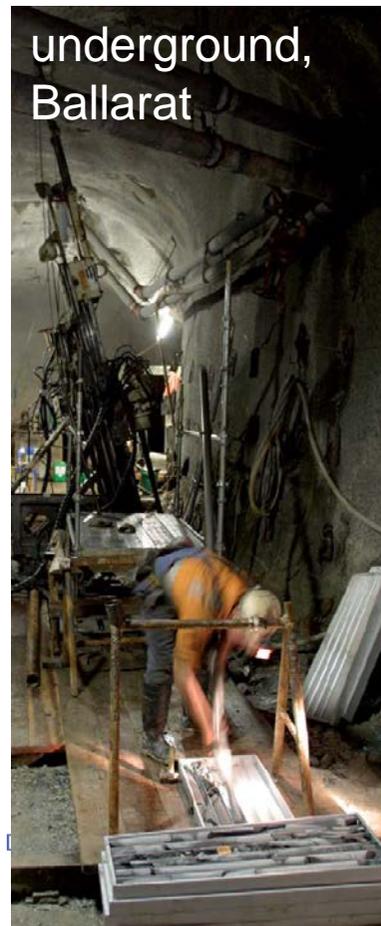

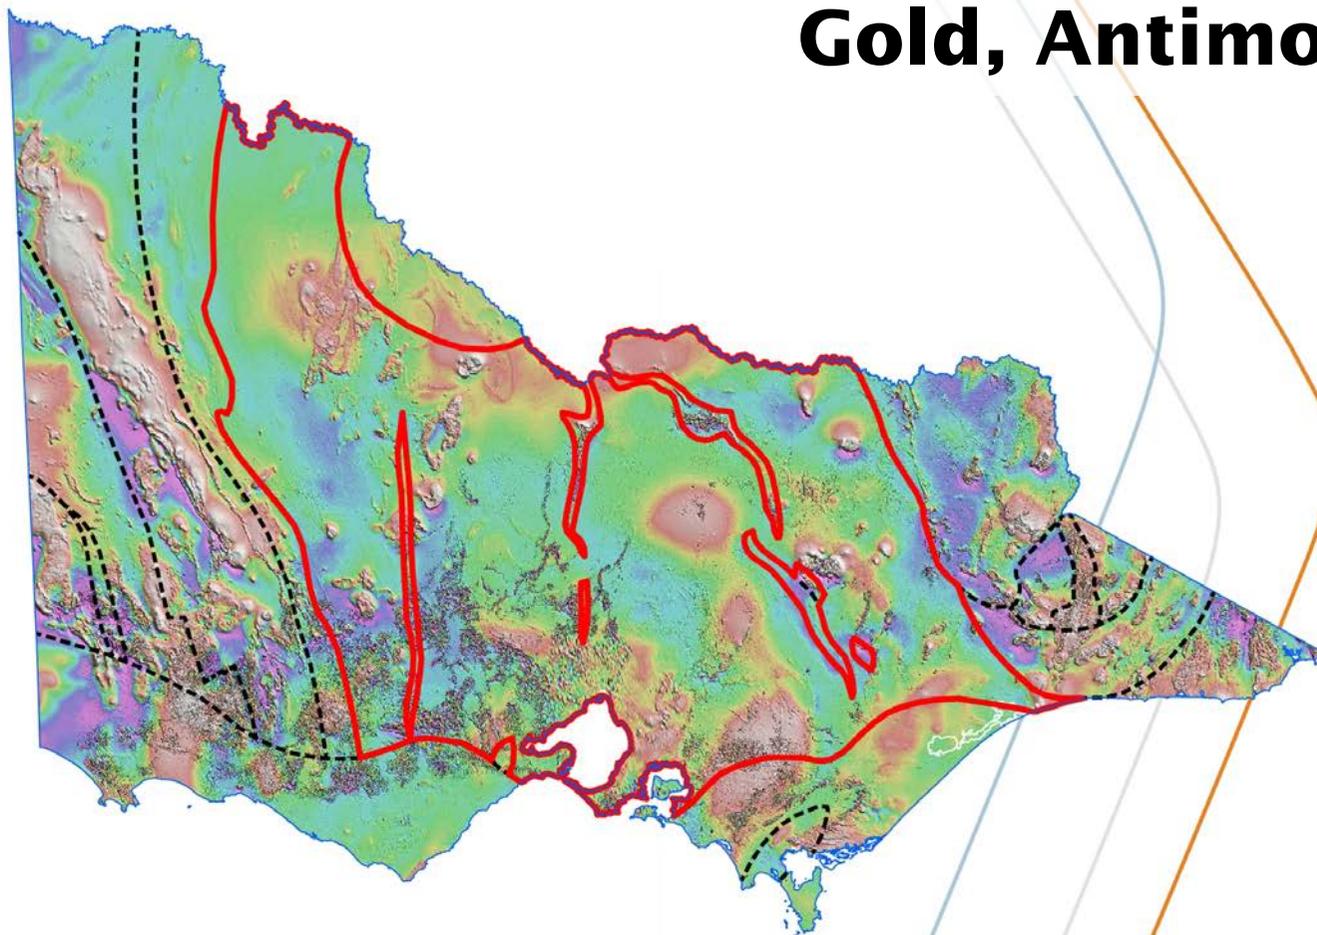

Bendigo Orogenic Gold: Gold, Antimony

Antimony mine, Costerfield

Bendigo Orogenic Gold: Gold, Antimony

underground,
Ballarat

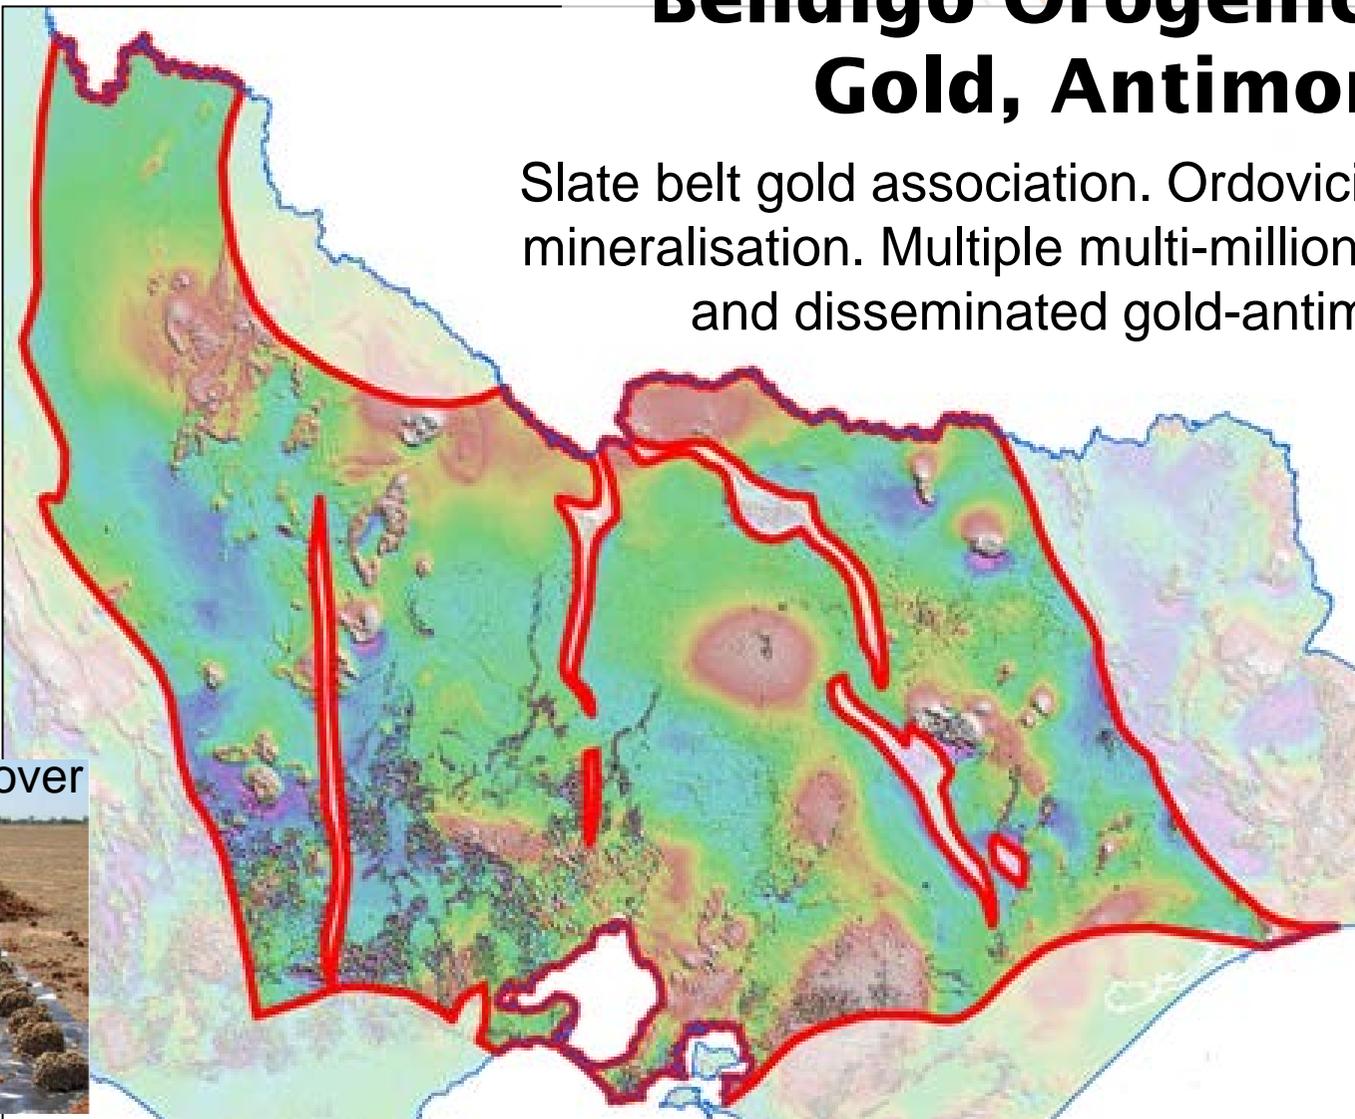

Underground at Bendigo – the Gill Reef

Bendigo Orogenic Gold: Gold, Antimony

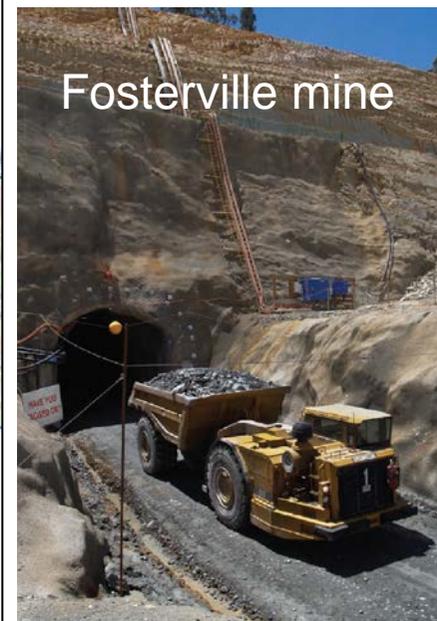

Slate belt gold association. Ordovician-Devonian age mineralisation. Multiple multi-million oz nuggetty gold and disseminated gold-antimony plays

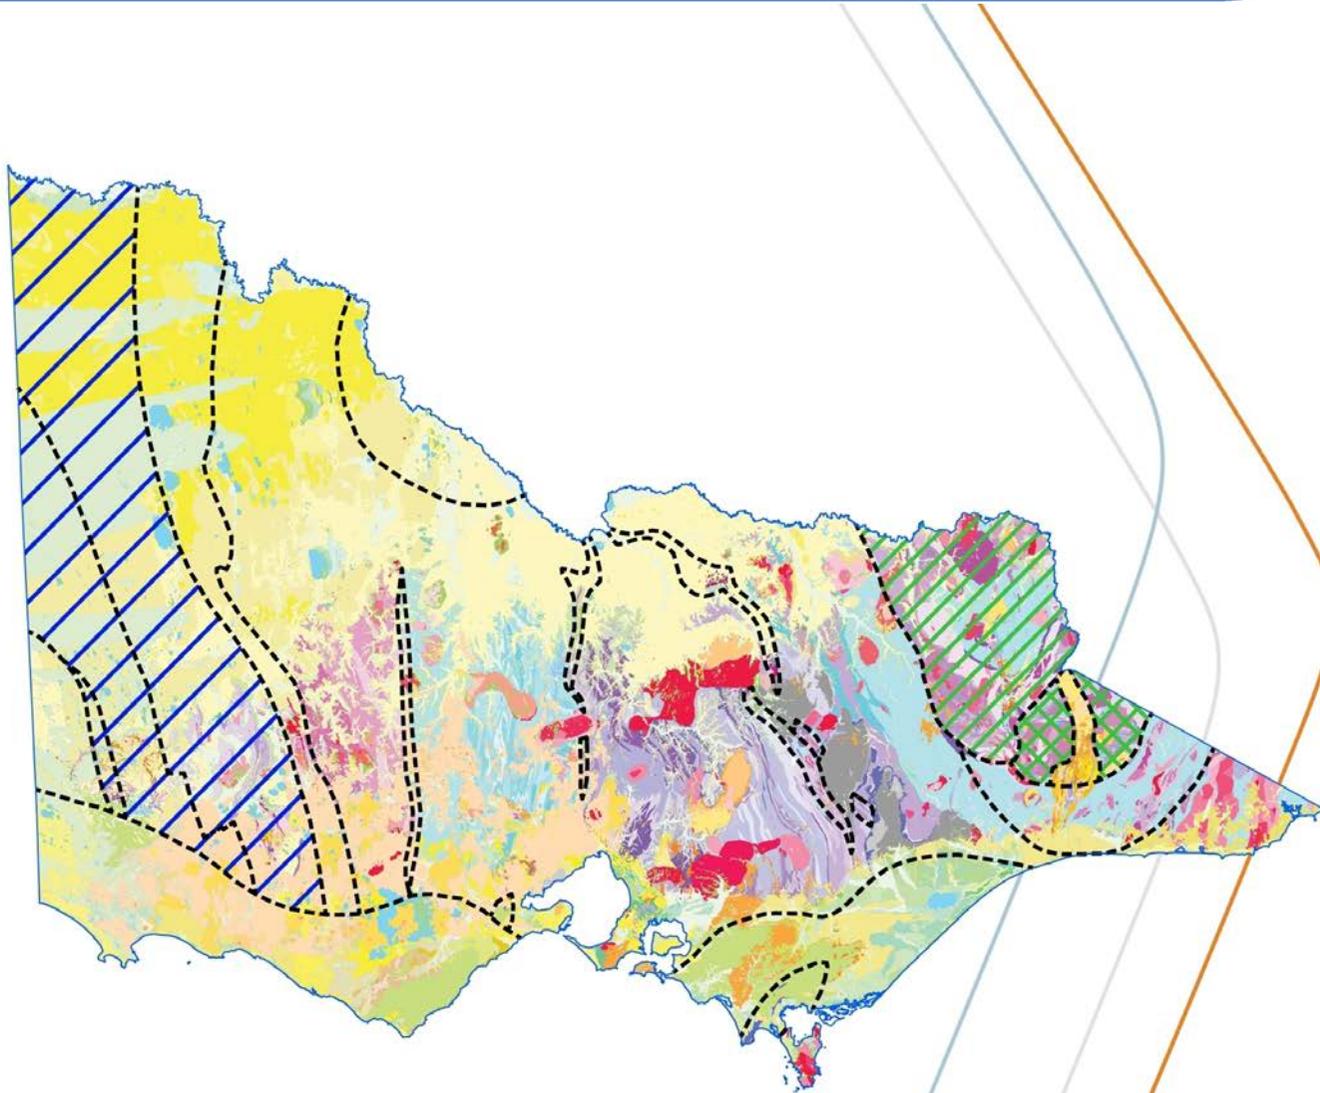

Tandara, under cover

Fosterville mine

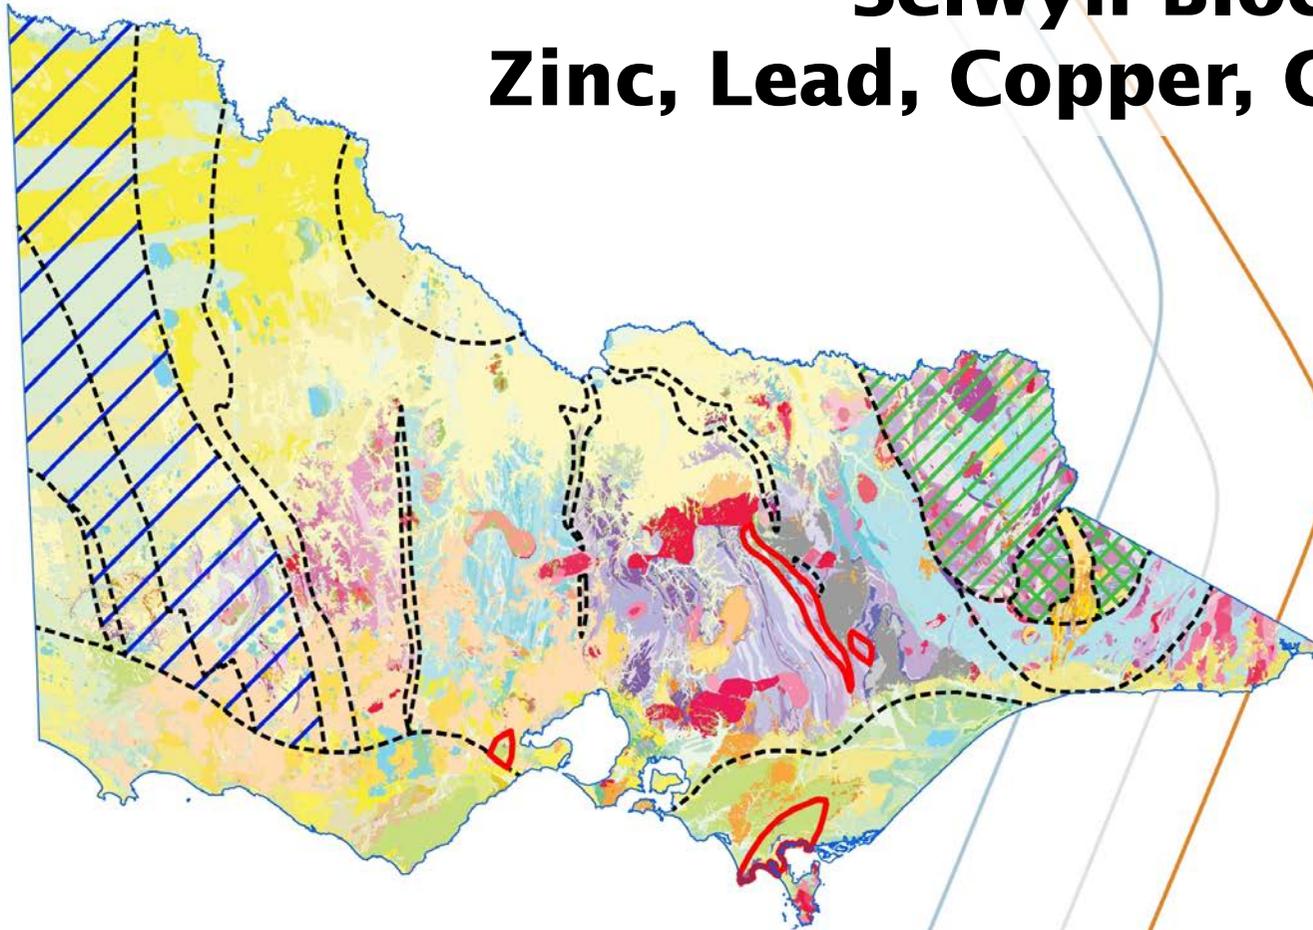

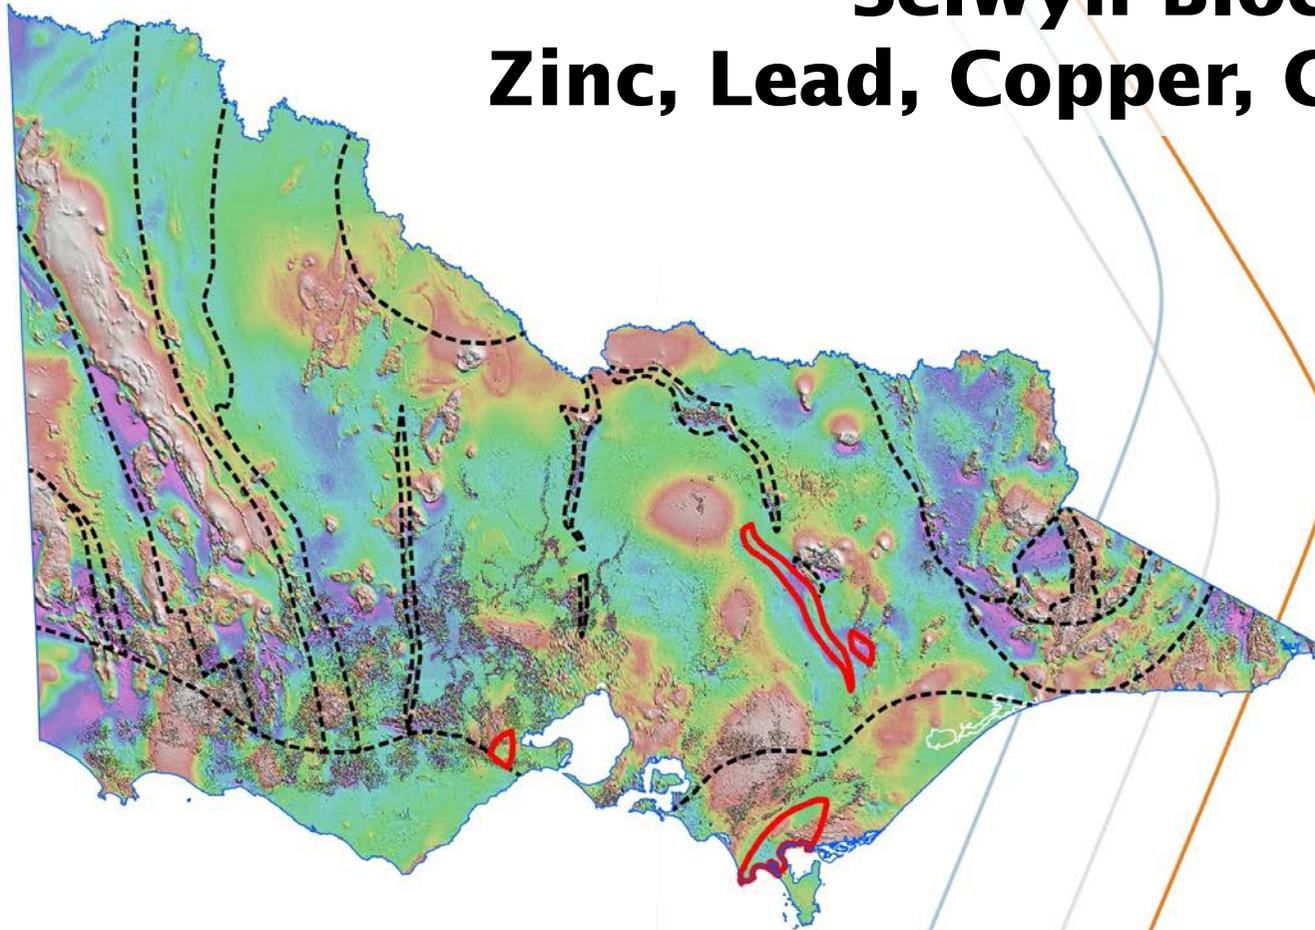

MINERALS
DEVELOPMENT
VICTORIA

Selwyn Block: Zinc, Lead, Copper, Gold, Nickel

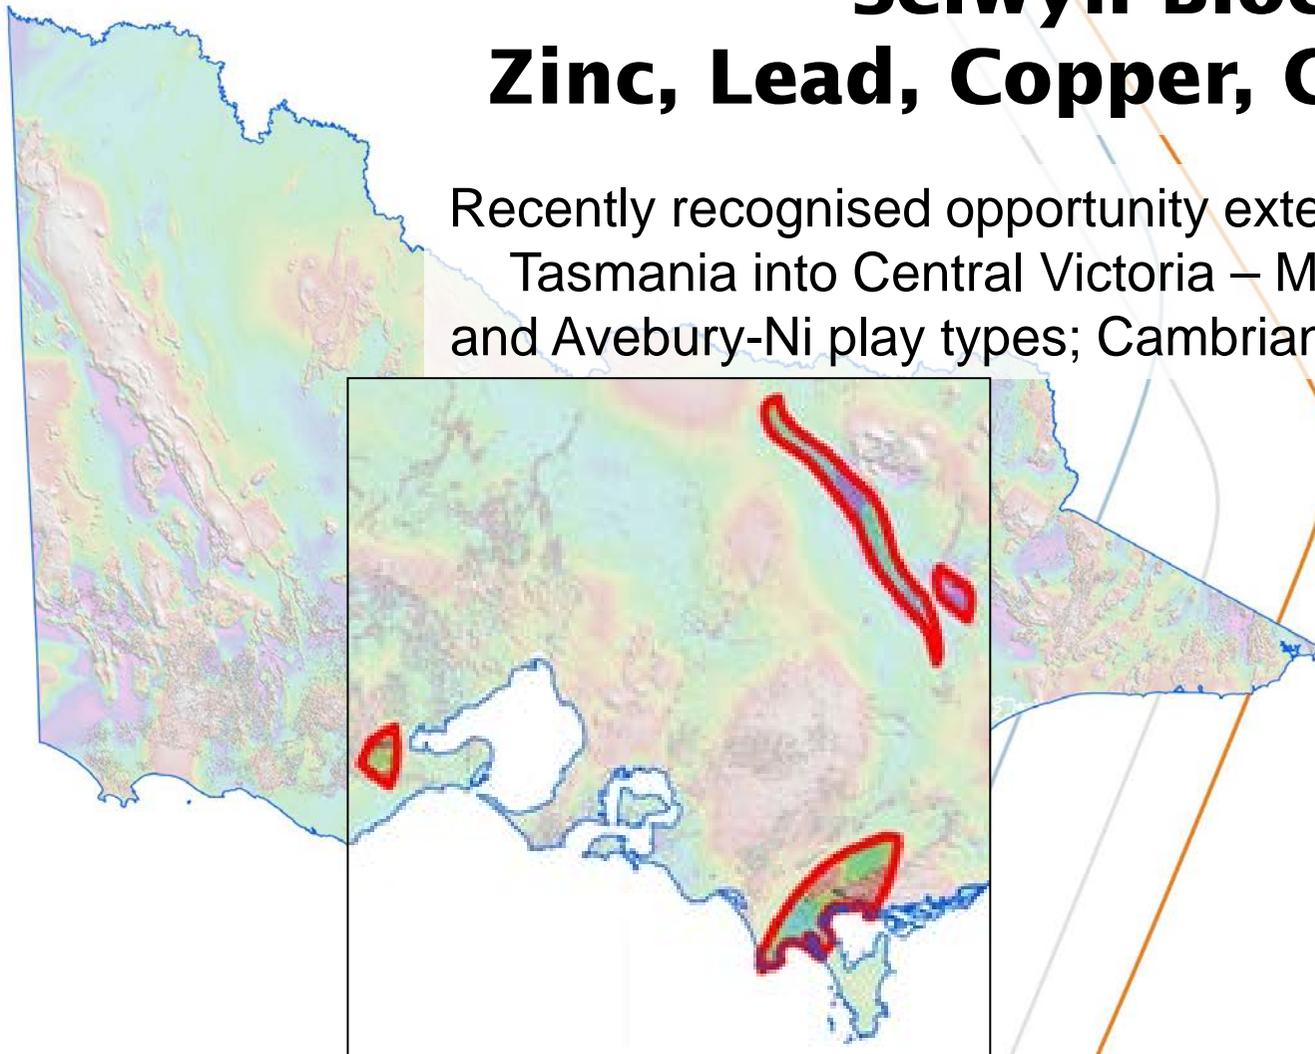

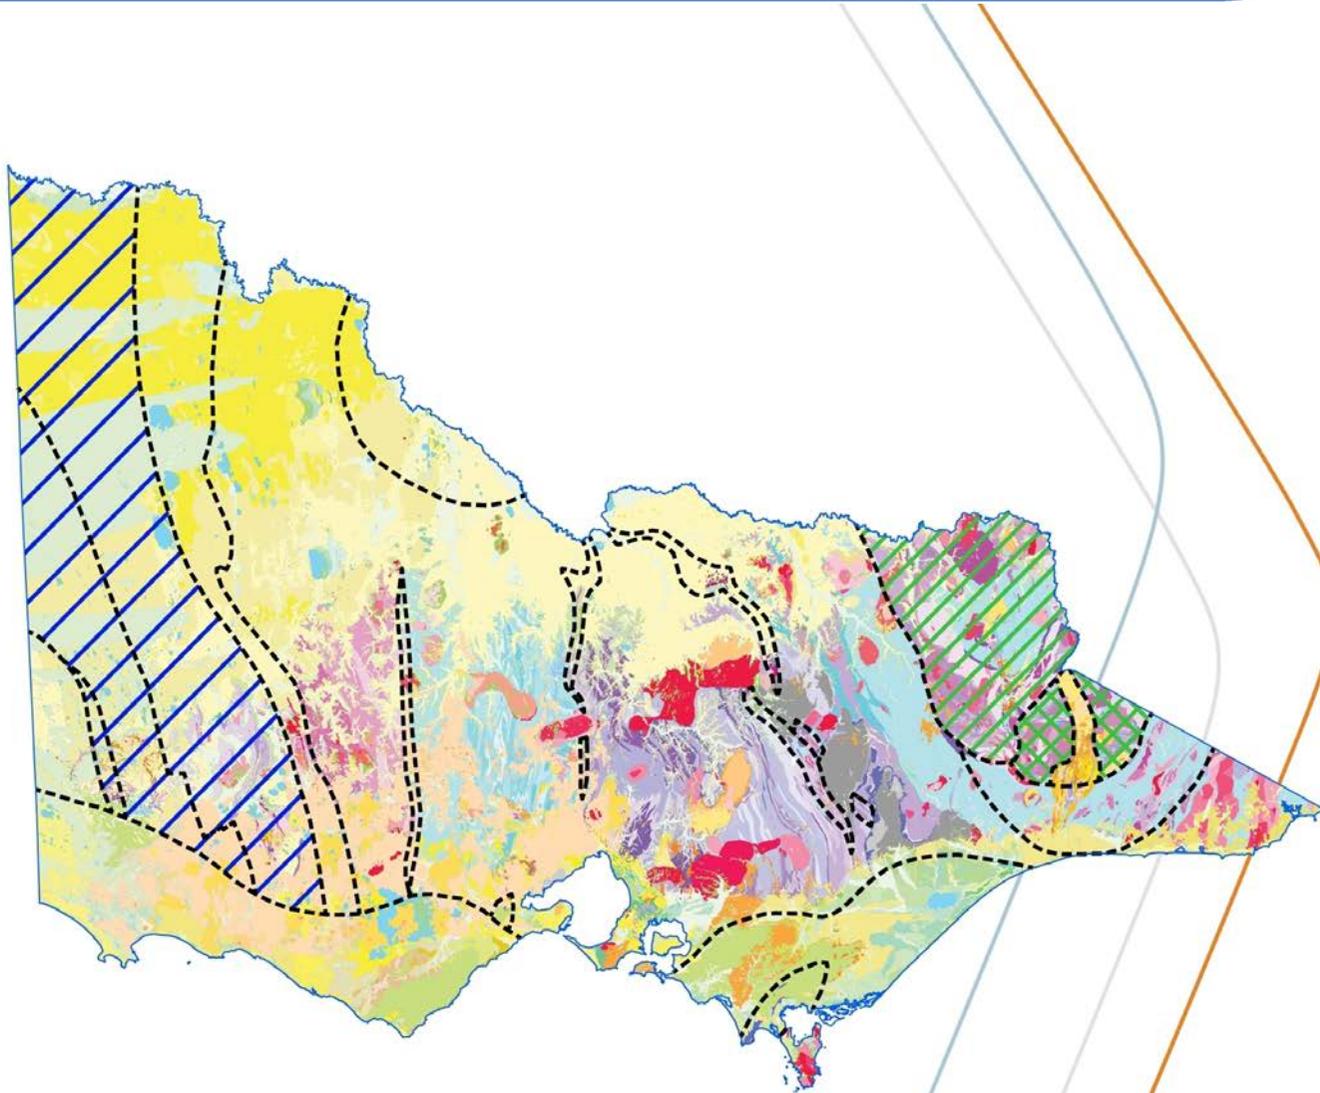

Selwyn Block: Zinc, Lead, Copper, Gold, Nickel

Selwyn Block: Zinc, Lead, Copper, Gold, Nickel

Recently recognised opportunity extending from western Tasmania into Central Victoria – Mt Read Volcanics and Avebury-Ni play types; Cambrian age mineralisation

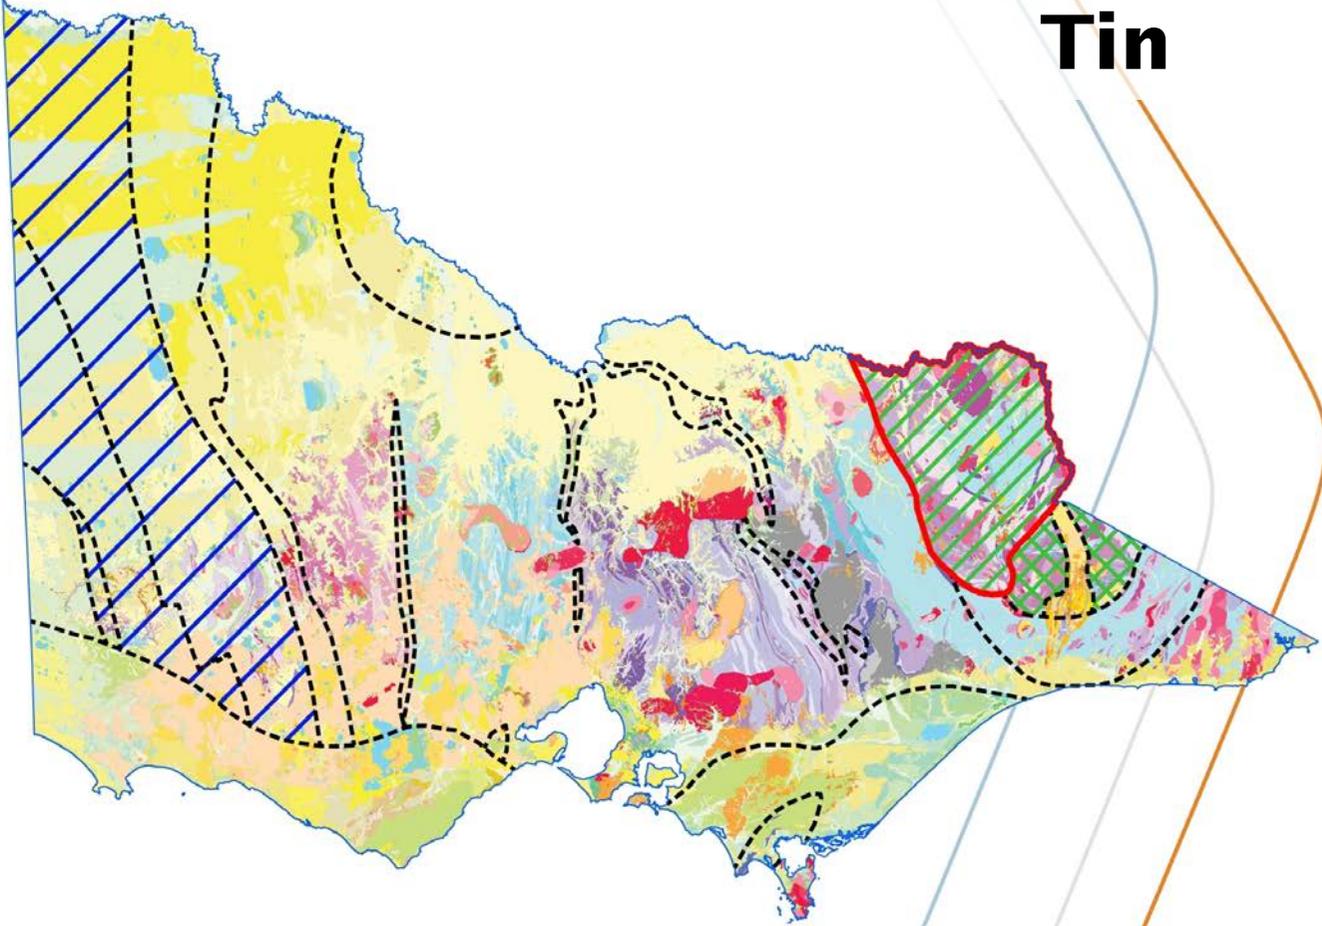

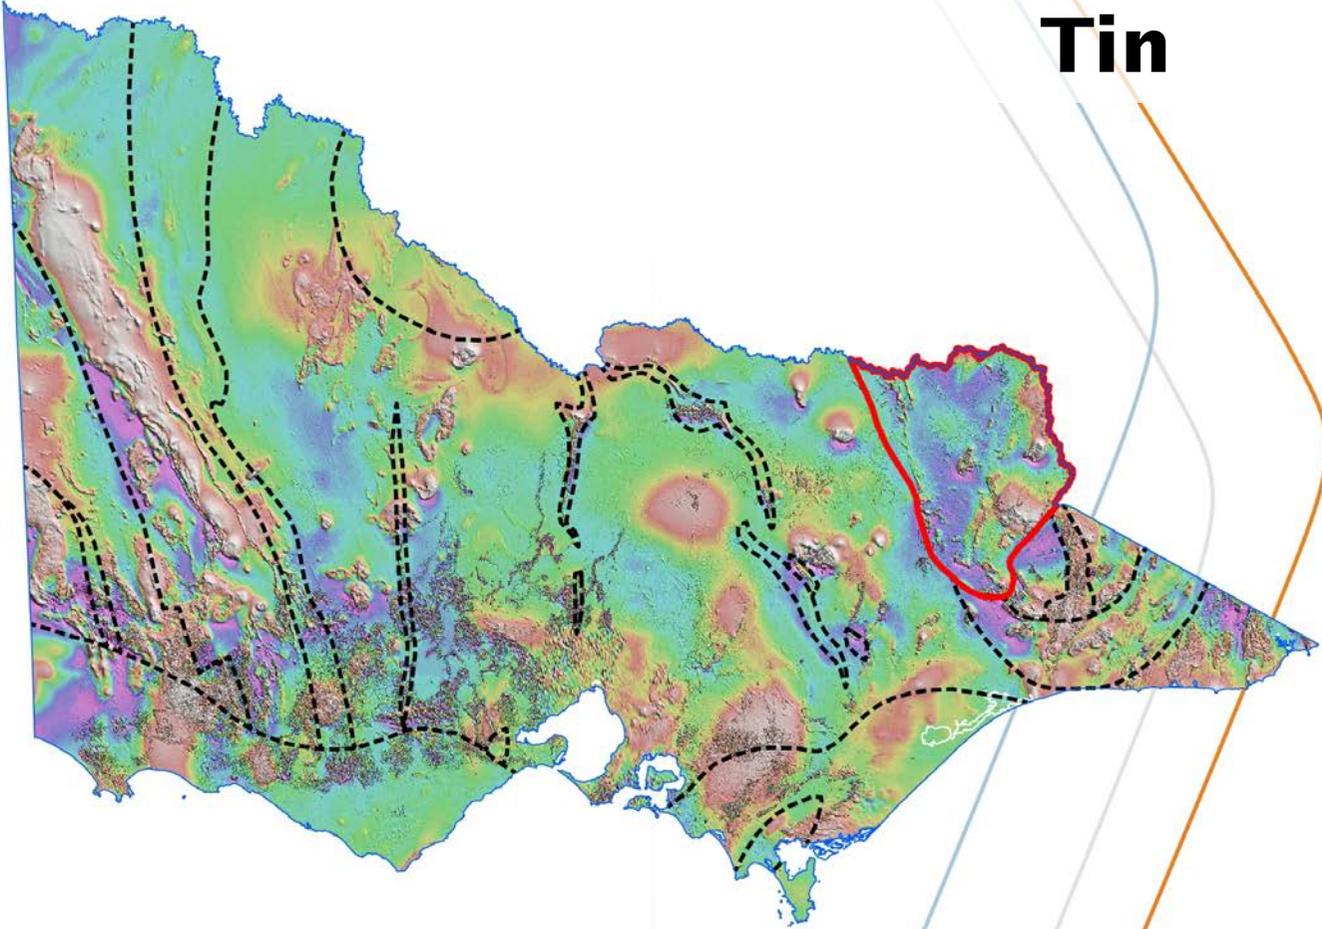

MINERALS
DEVELOPMENT
VICTORIA

Wagga-Omeo Zone: Tin

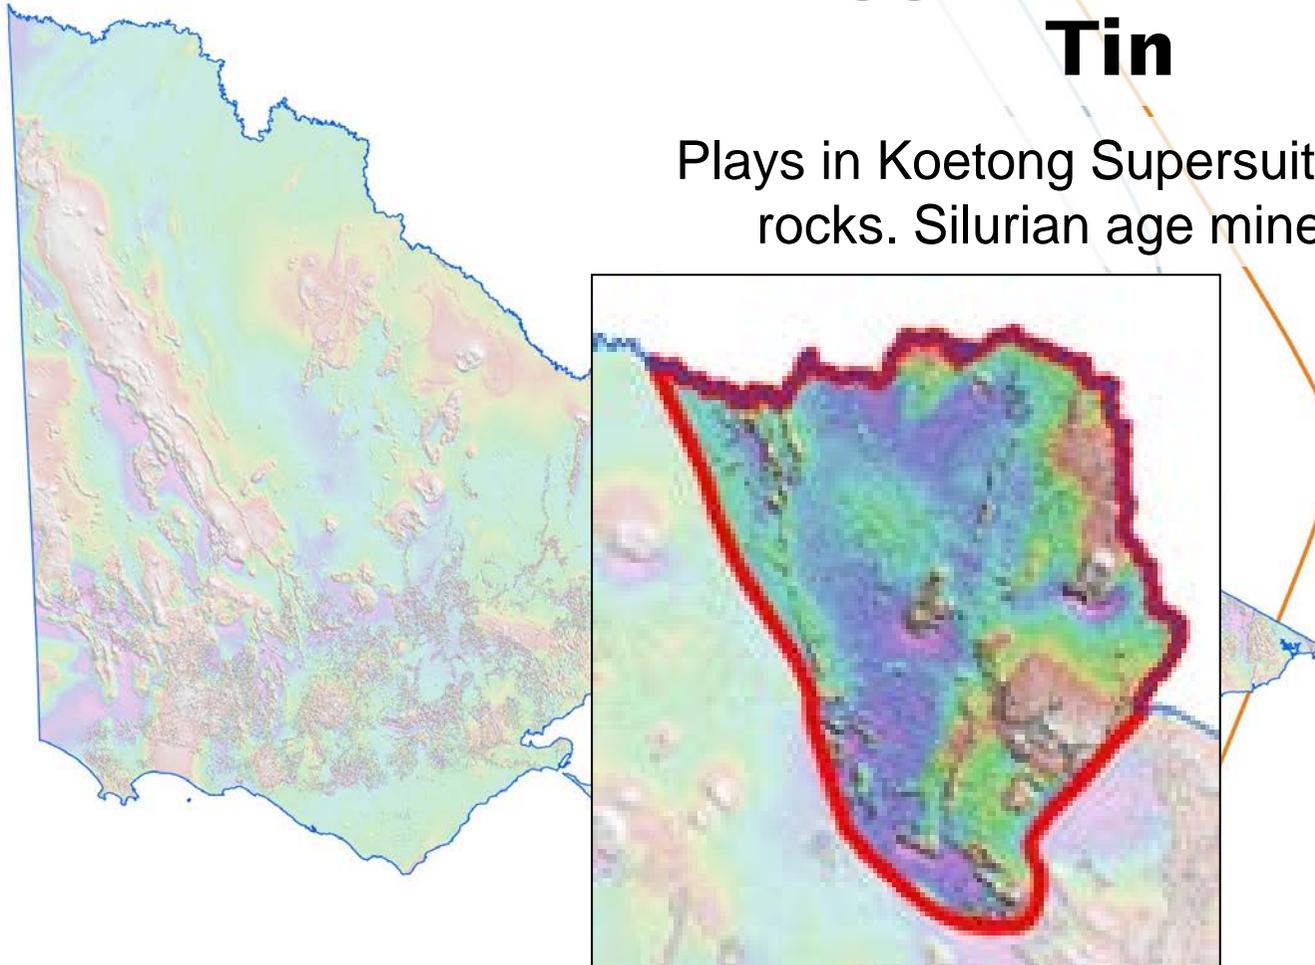

Wagga-Omeo Zone: Tin

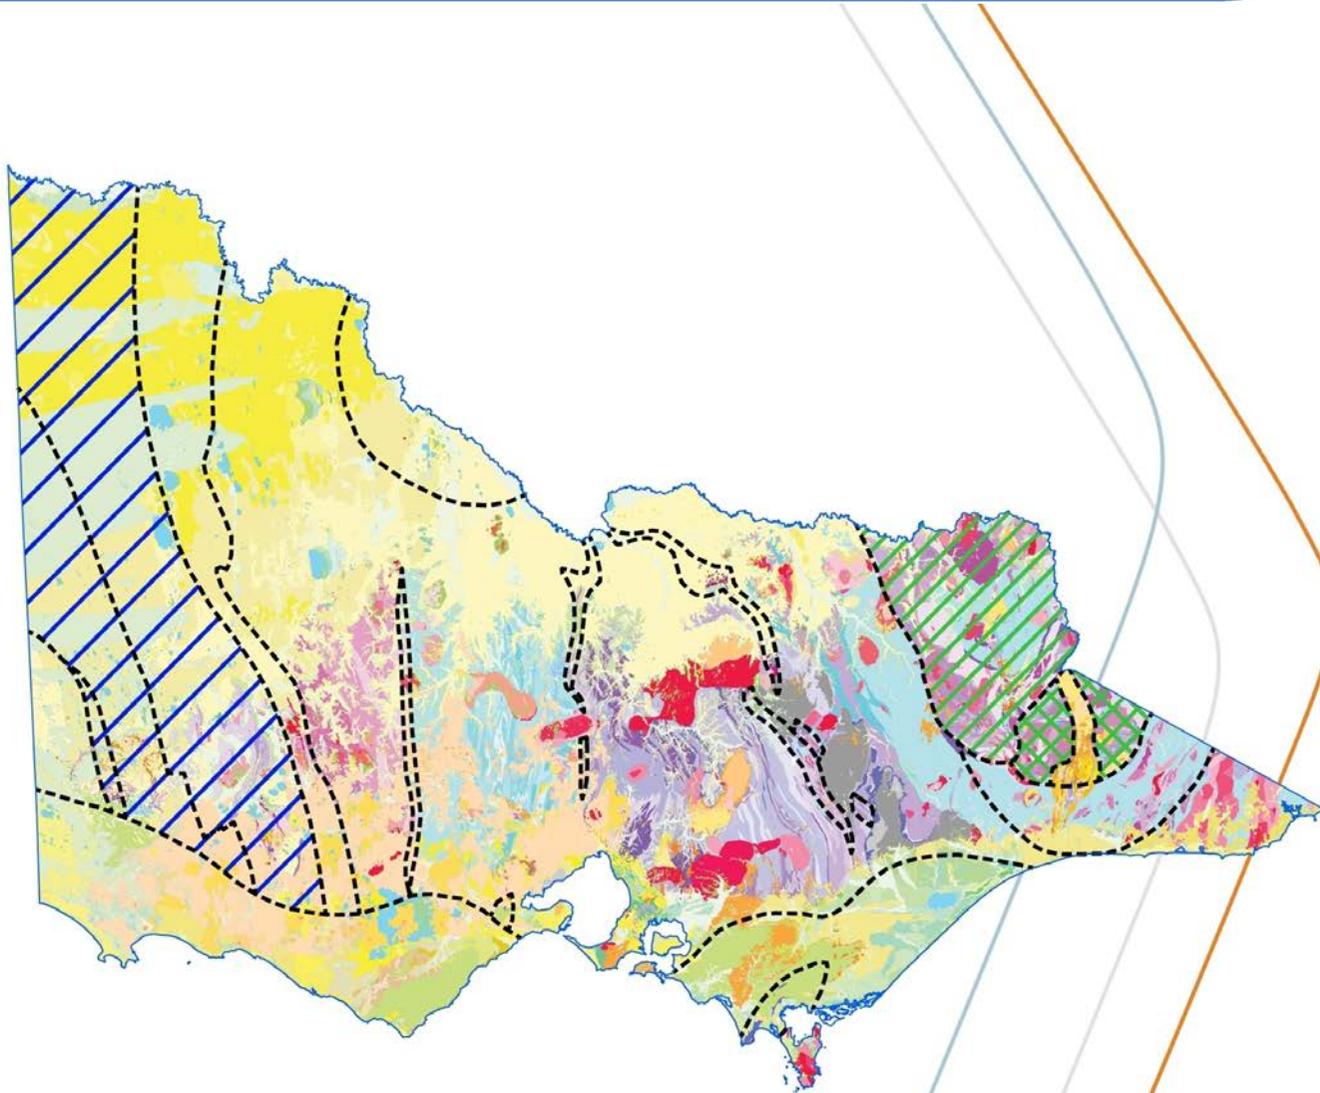

Wagga-Omeo Zone: Tin

Plays in Koetong Supersuite igneous
rocks. Silurian age mineralisation

Real-time
multi-element
chemical analysis

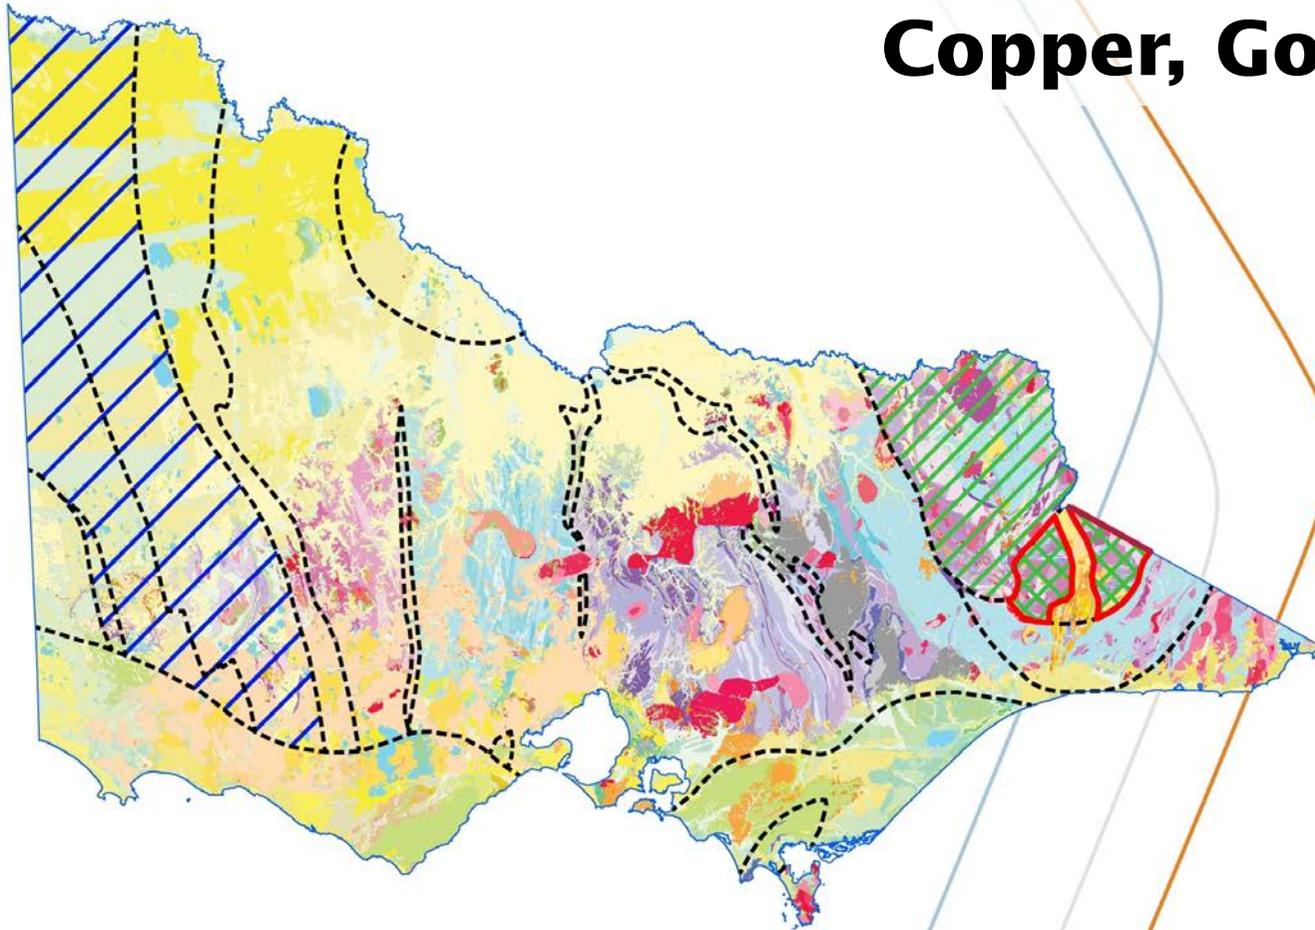

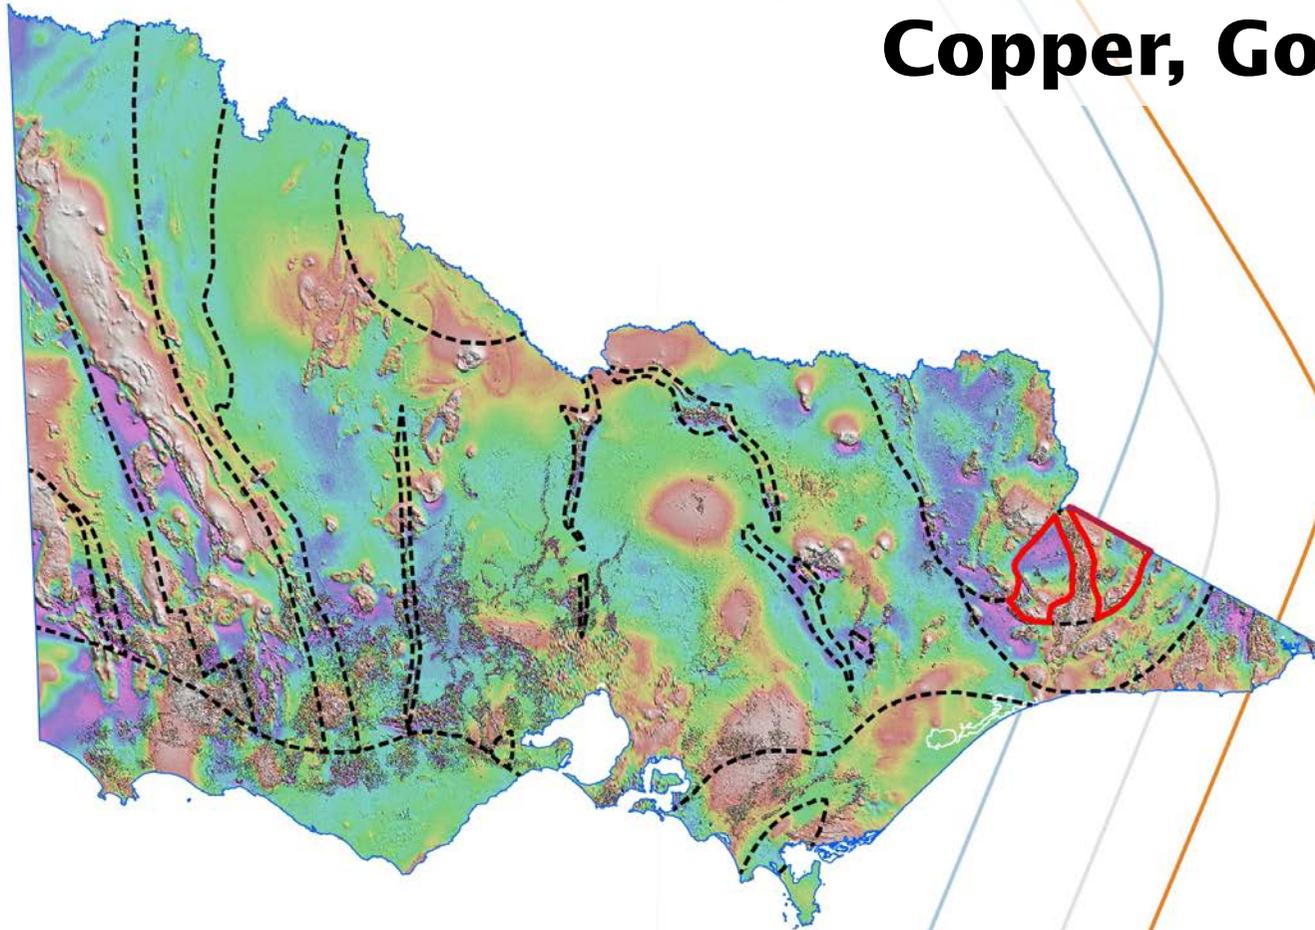

MINERALS
DEVELOPMENT
VICTORIA

Macquarie Arc Base Metals: Copper, Gold

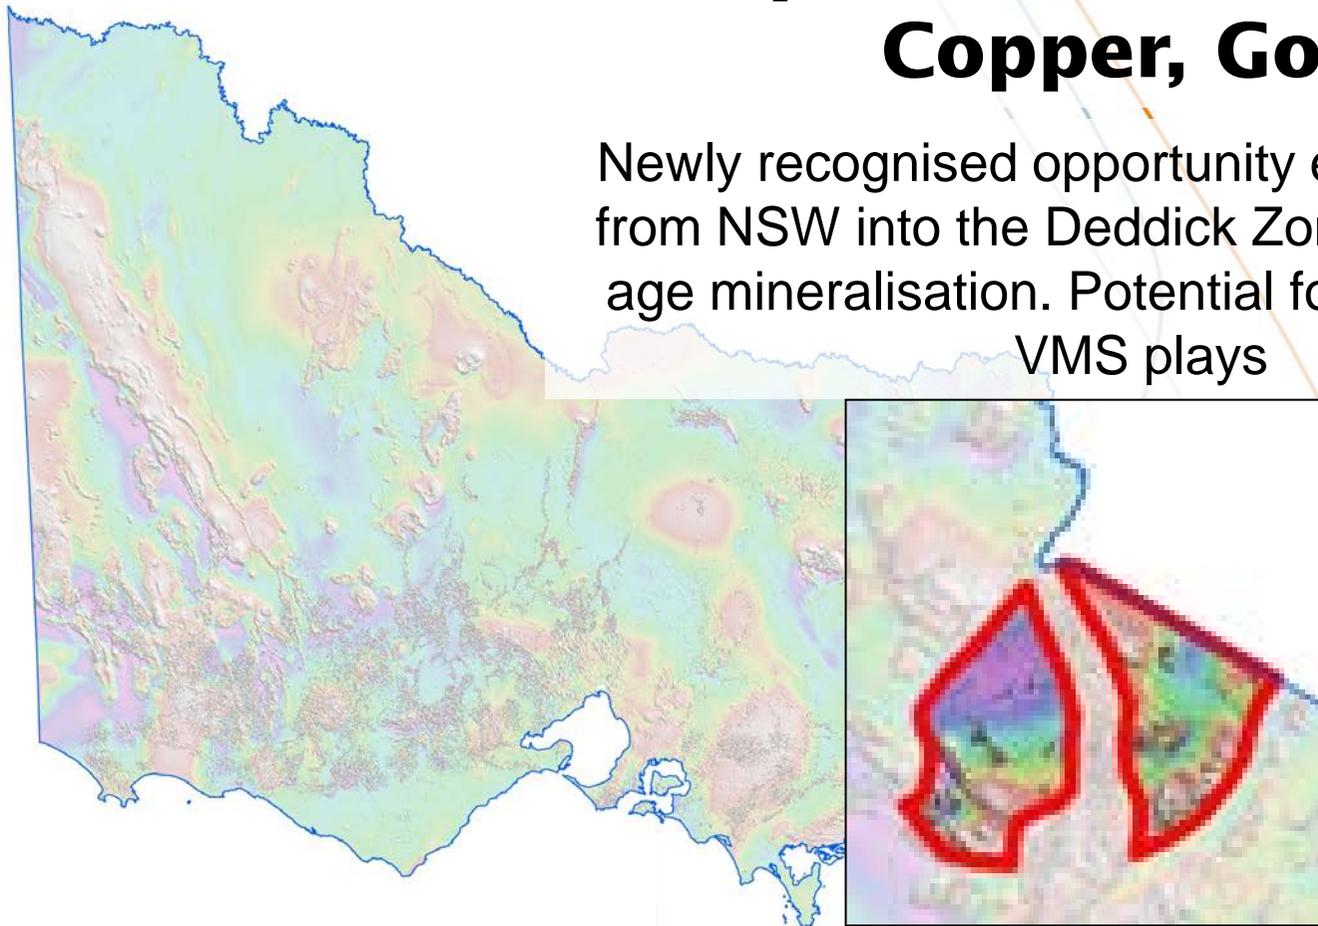

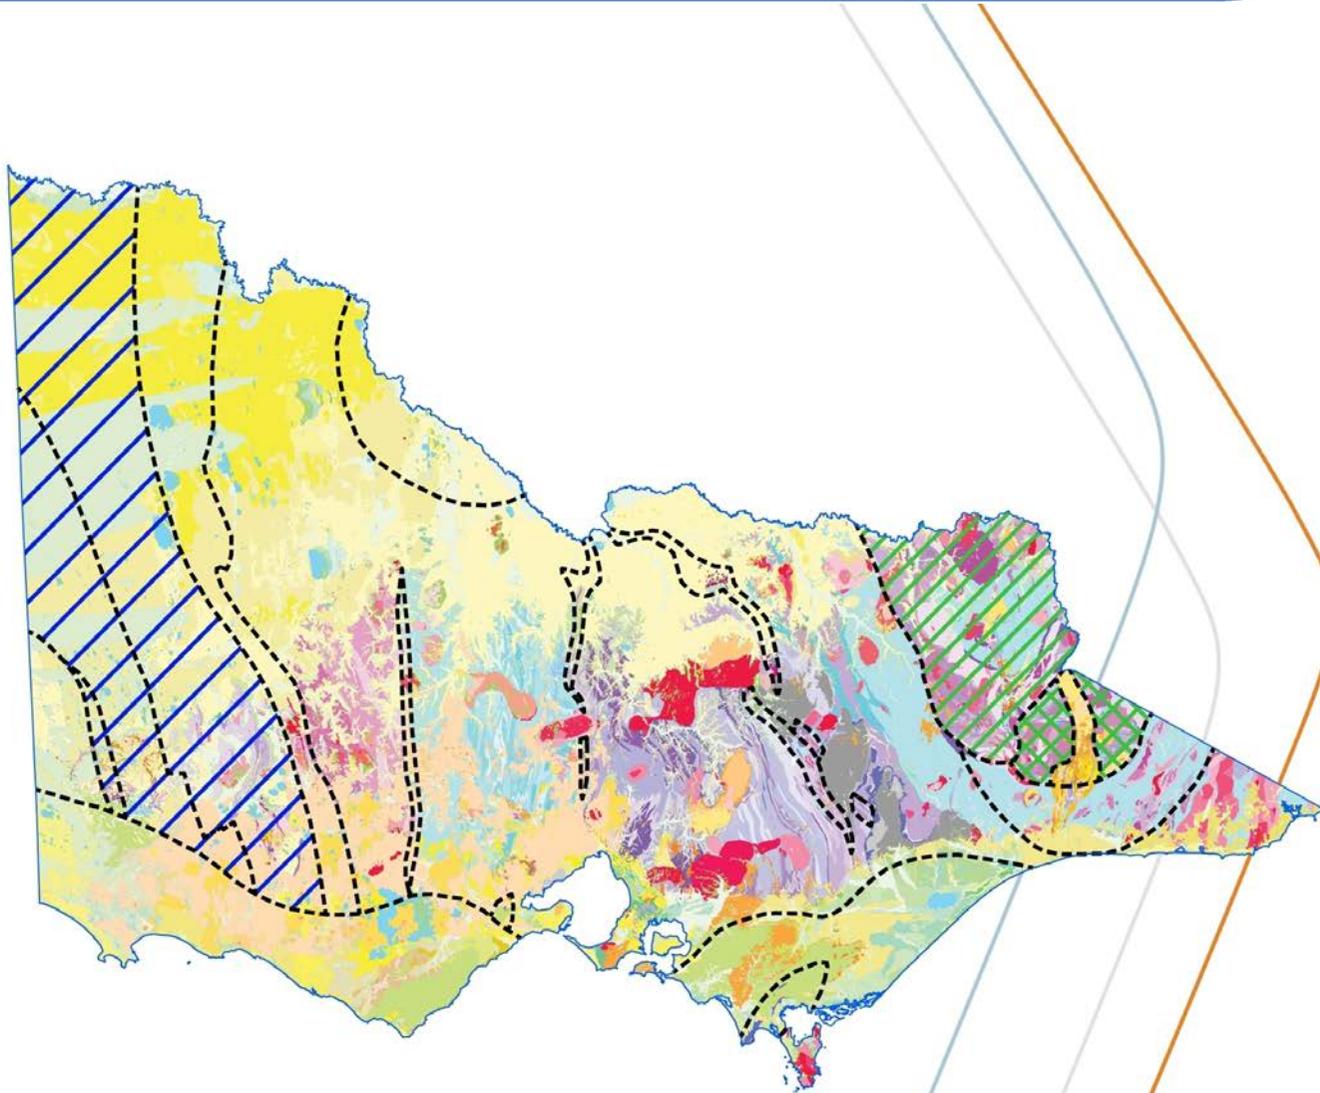

Macquarie Arc Base Metals: Copper, Gold

Macquarie Arc Base Metals: Copper, Gold

Newly recognised opportunity extending south from NSW into the Deddick Zone – Ordovician age mineralisation. Potential for porphyry and VMS plays

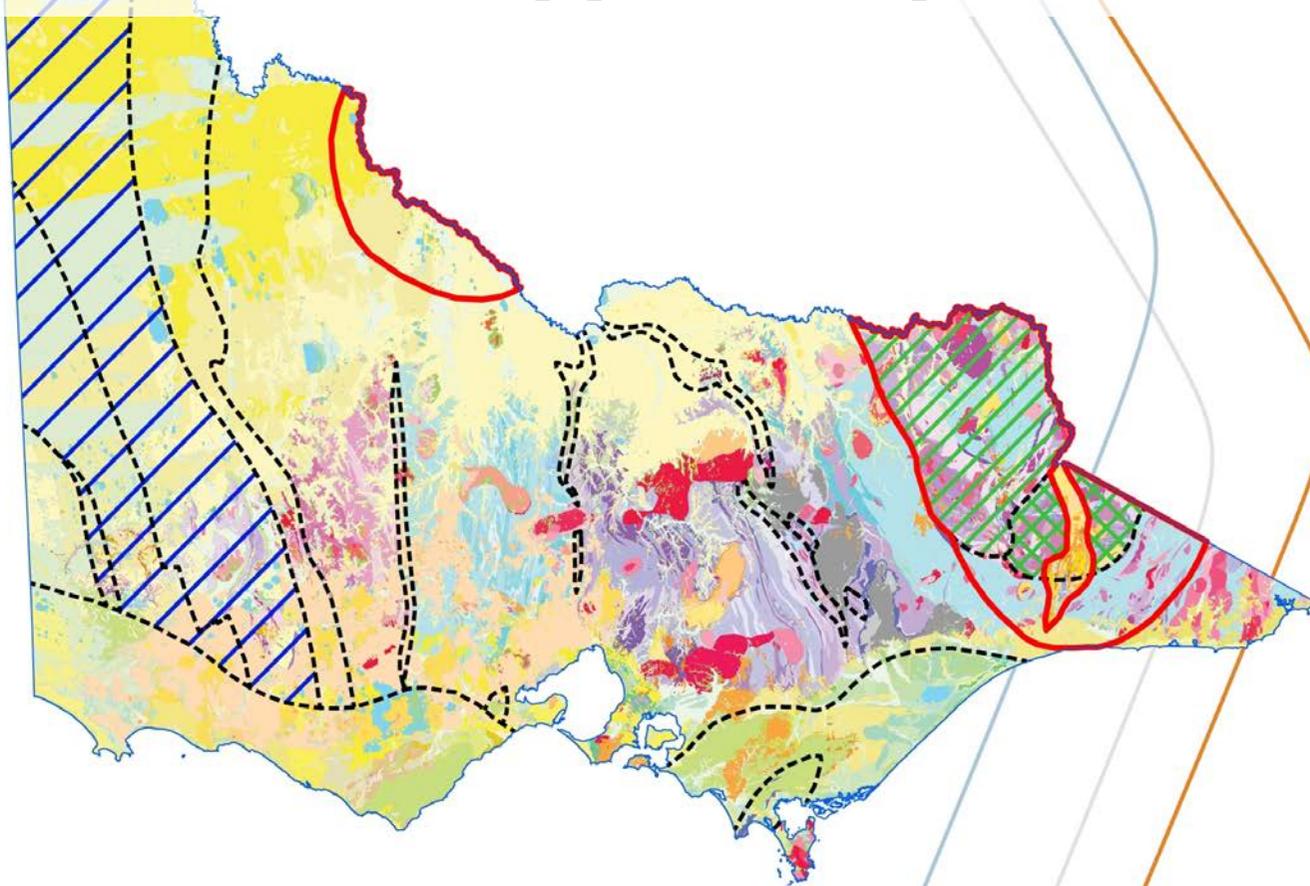

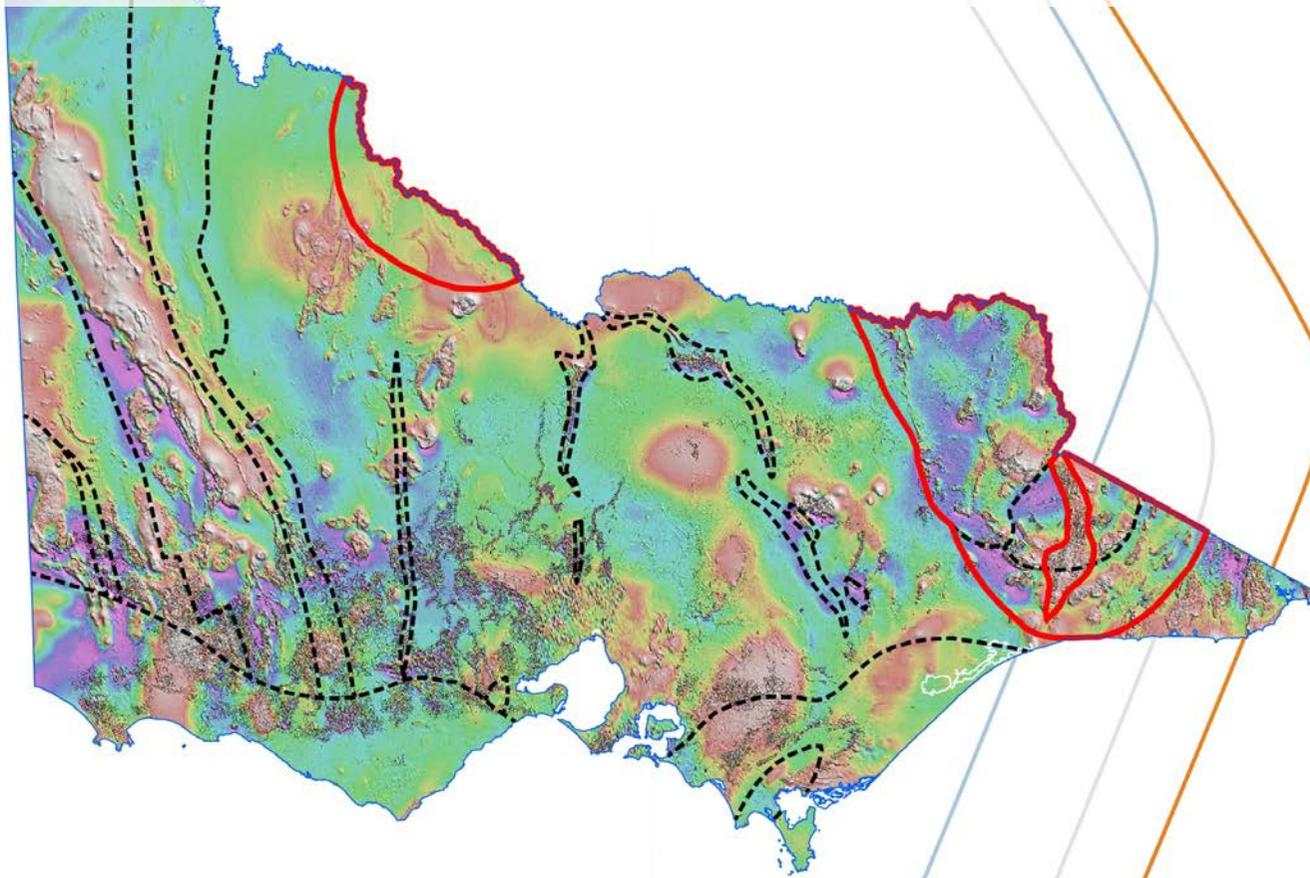

MINERALS
DEVELOPMENT
VICTORIA

Macquarie Arc Derivatives: Lead, Zinc, Copper, Molybdenum, Gold, Iron

Macquarie Arc Derivatives: Lead, Zinc, Copper, Molybdenum, Gold, Iron

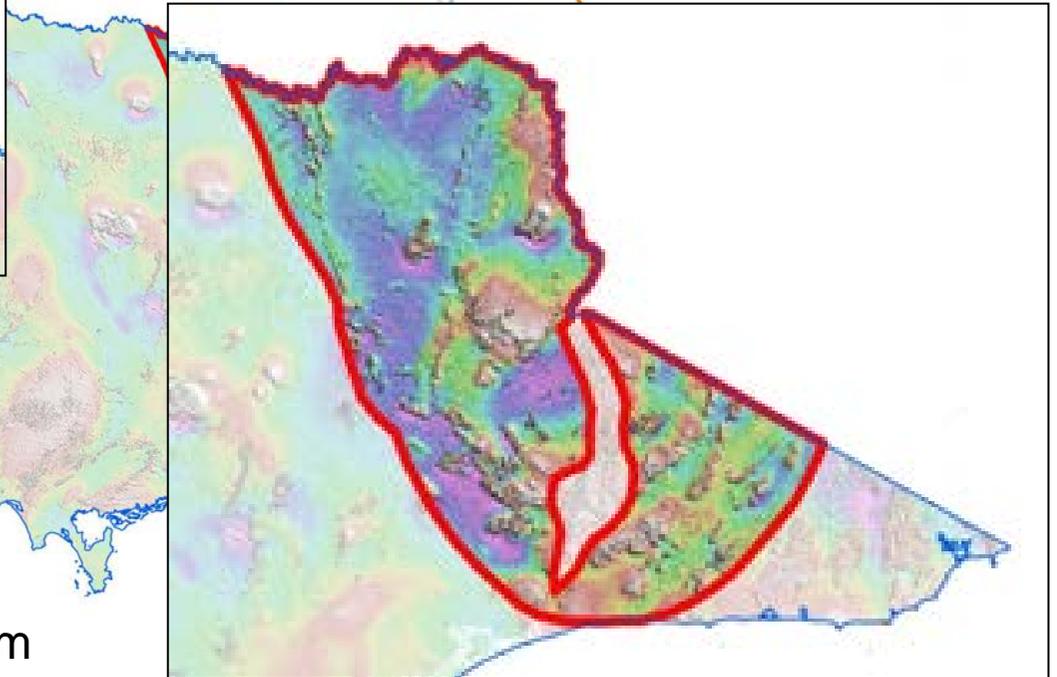

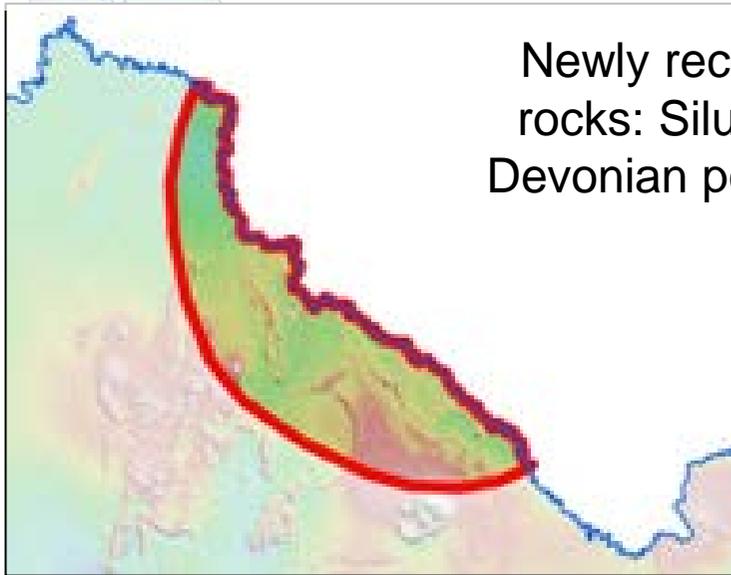

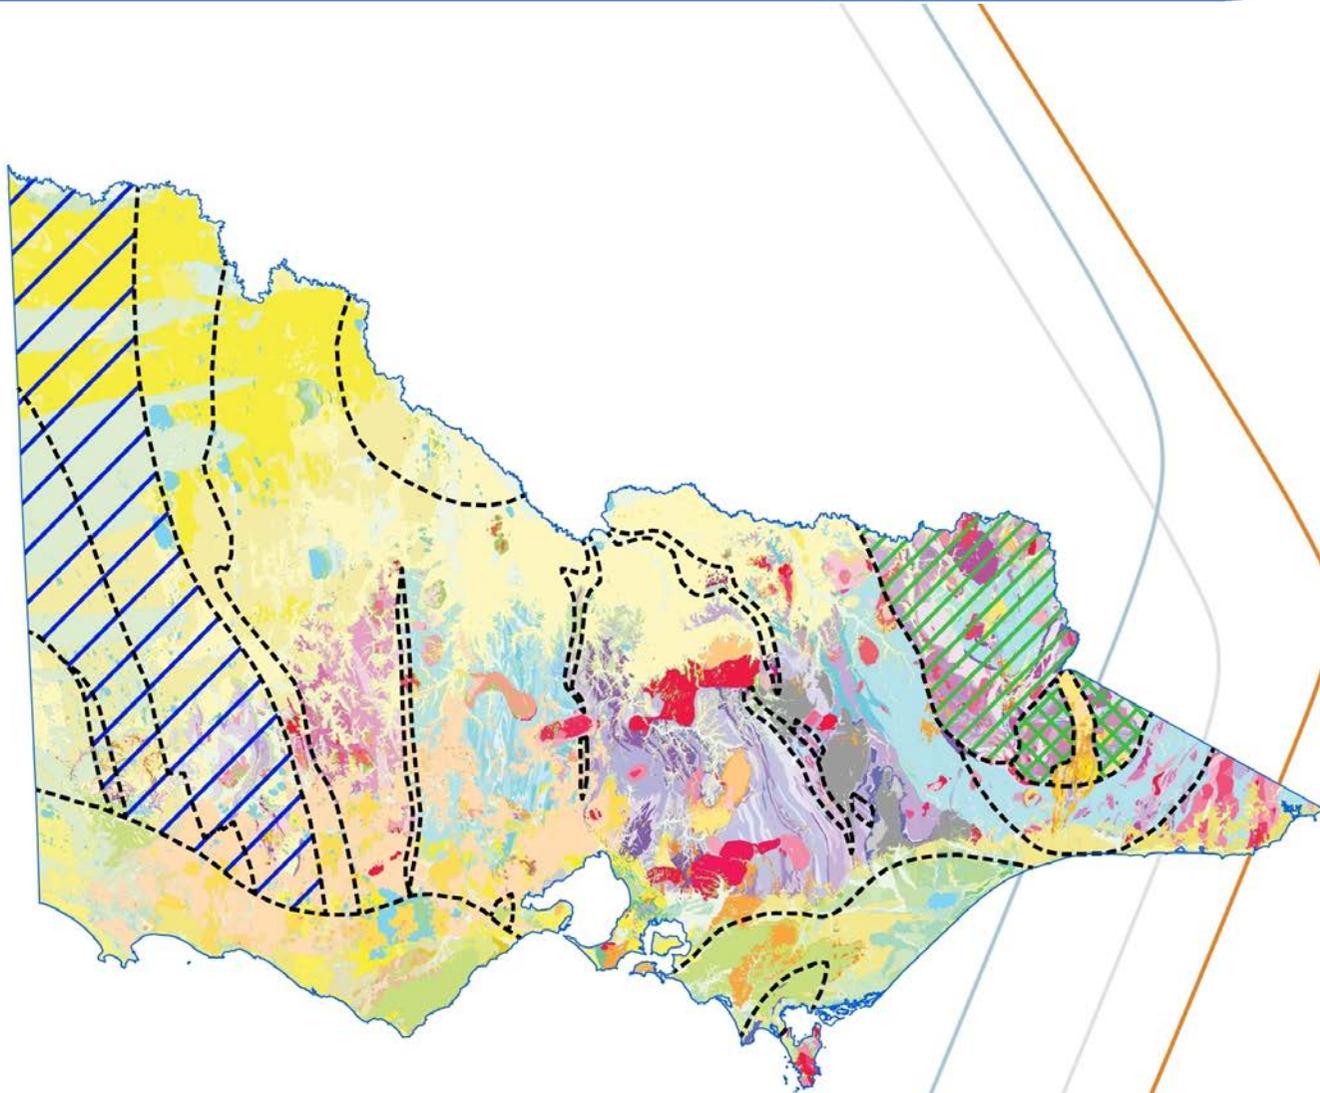

the Wilga Decline, Benambra

Macquarie Arc Derivatives: Lead, Zinc, Copper, Molybdenum, Gold, Iron

Newly recognised context for several play types in overlying rocks: Silurian back-arc/rift VMS (eg. Benambra Zn/Cu (Ag), Devonian porphyry (eg. Mt Unicorn Mo/Cu). Full areal extent of potential now recognised

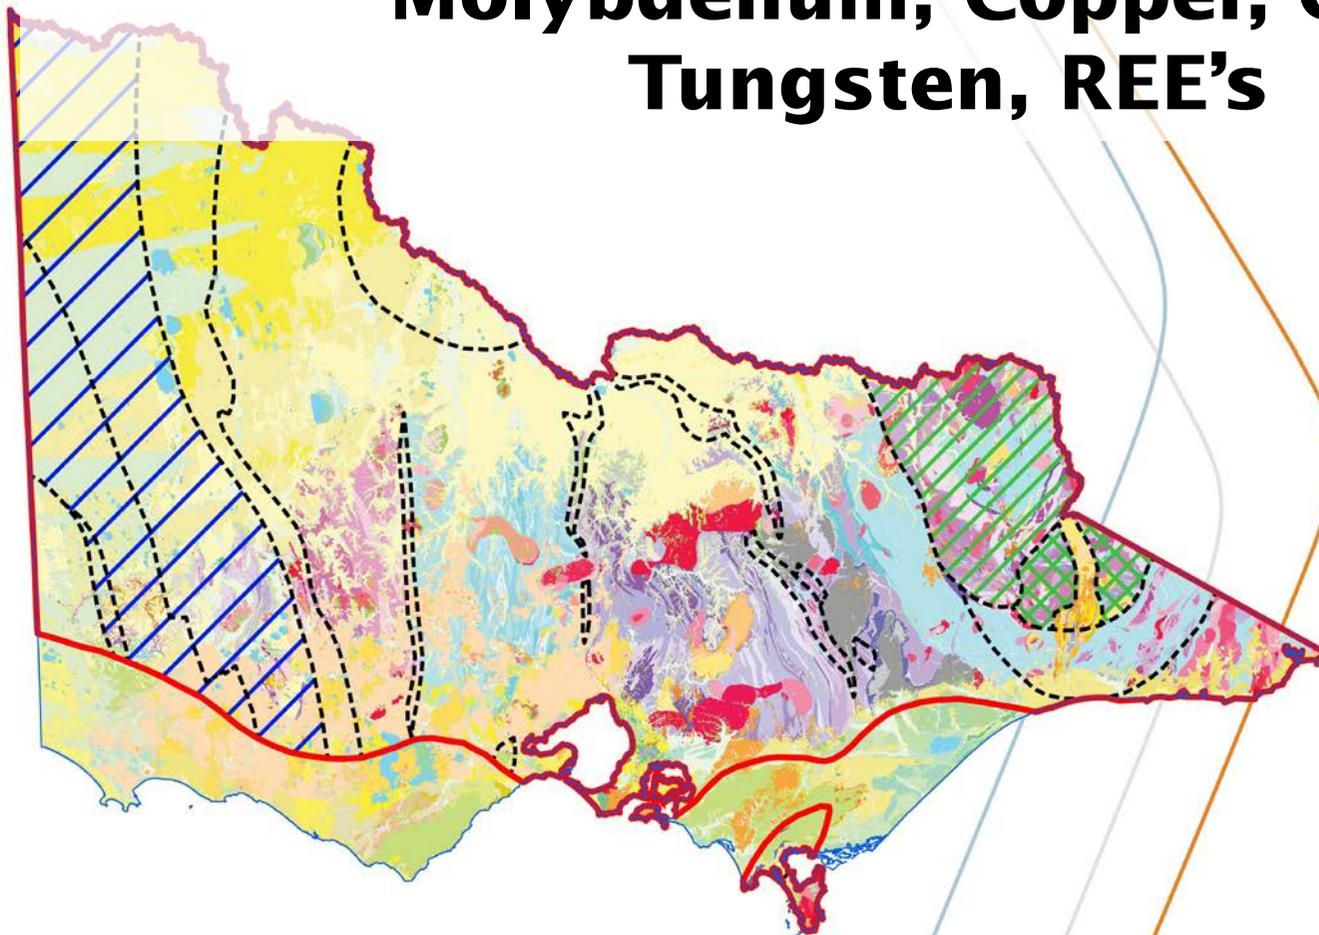

sampling Mt Unicorn molybdenum

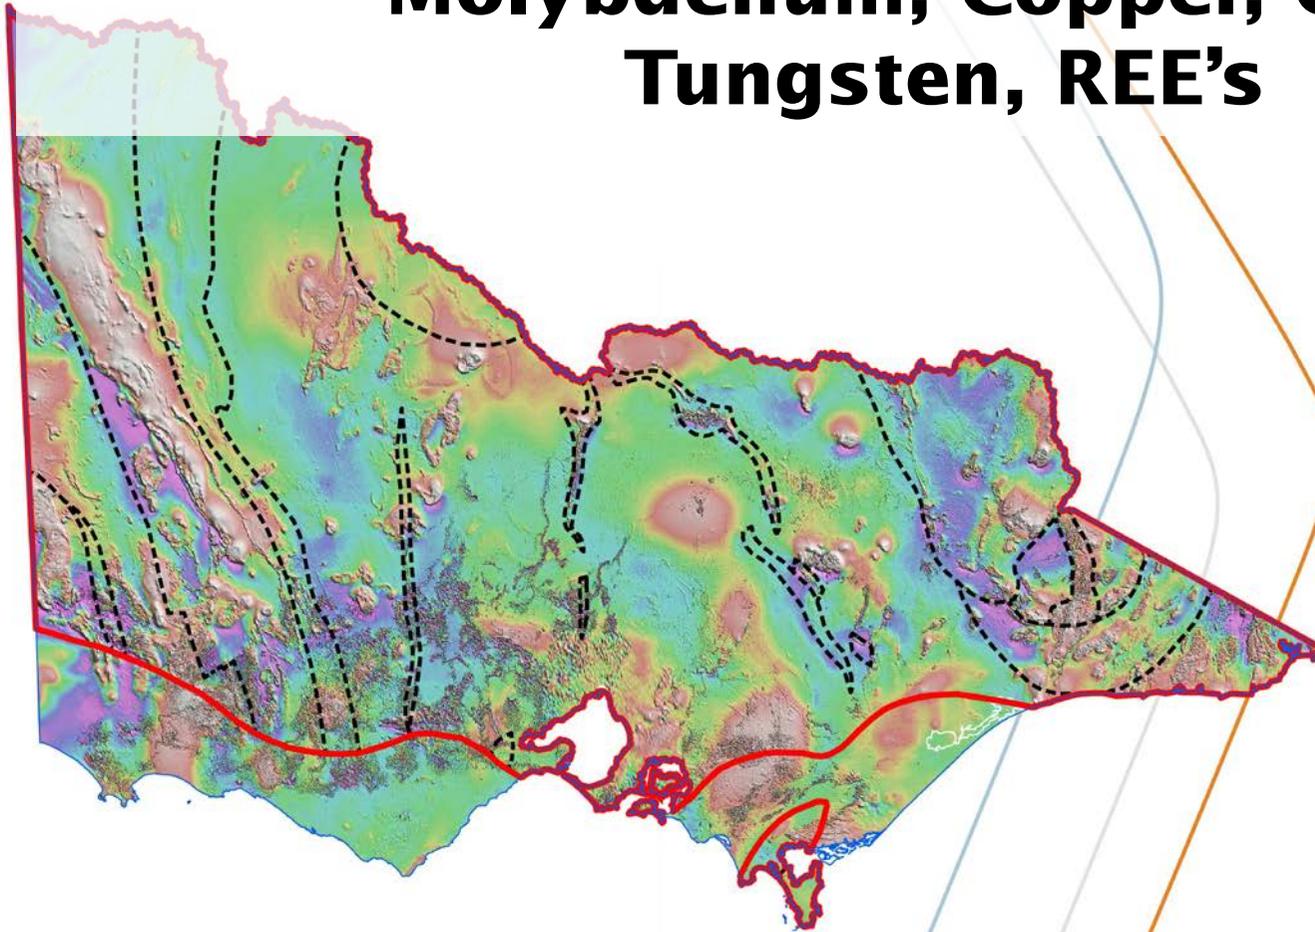

MINERALS
DEVELOPMENT
VICTORIA

Devonian magmatic-hydrothermal metals: Molybdenum, Copper, Gold, Tungsten, REE's

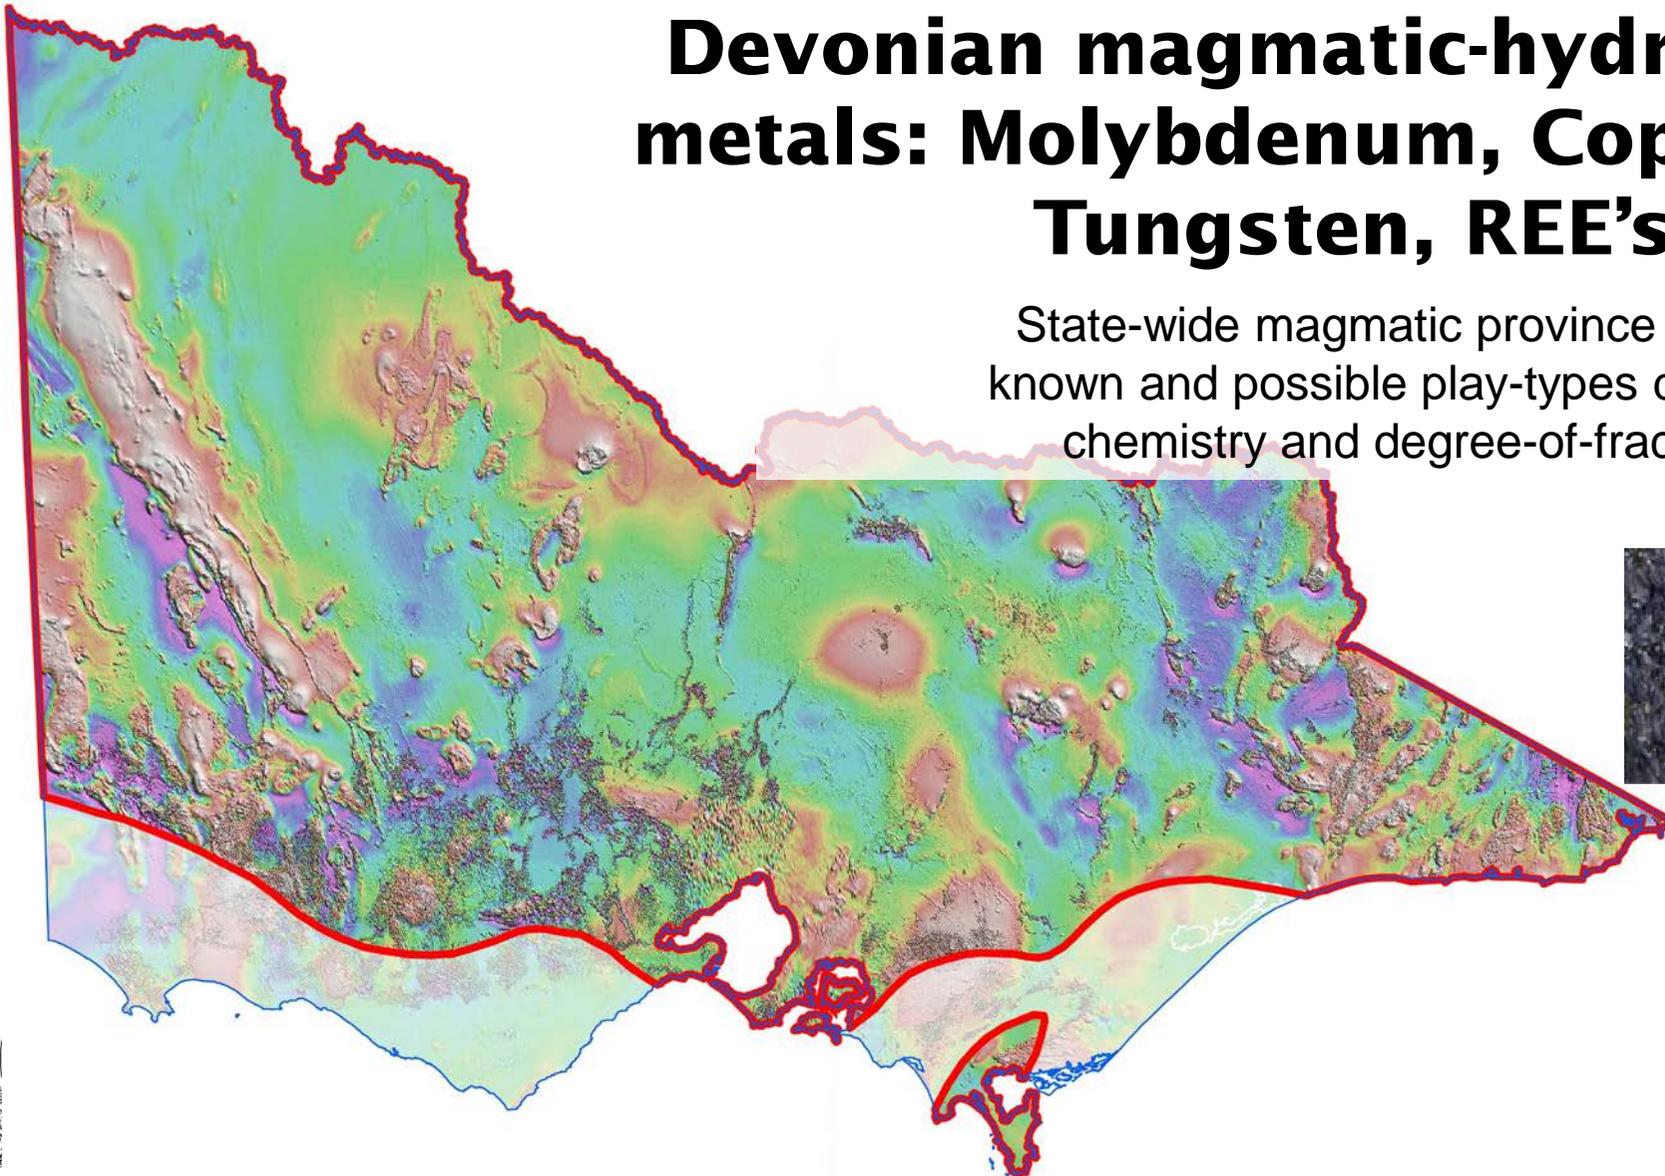

Devonian magmatic-hydrothermal metals: Molybdenum, Copper, Gold, Tungsten, REE's

Devonian magmatic-hydrothermal metals: Molybdenum, Copper, Gold, Tungsten, REE's

State-wide magmatic province - a range of known and possible play-types depending on chemistry and degree-of-fractionation.

molybdenite,
Mt Unicorn

Small State, BIG opportunities...
